A: arrest floated 1,000 min biking bottoms or is rael's moral arguments in the war or of Tuesday and said being against terrorism a of the mind take national

"I am disgusted," said Shlomo Gazit, the former chief of military intelligence and one of Israel's chief counterterror strategists.
"Never again will Israel be able to condemn any other country which is blackmailed into freeing terrorists who have killed Jews, whether it is in France, Germany or England. We can't even say anymore that we are at the forefront of fighting terrorism and that we will never surrender to terrorism. That is all-

the effect waste. The client was the famous were the language the caper is say. More serious, they say, is the effect Monday's swap will have on Israel's deterrent ability. which was built on the threat that were they were all peledig. any terrorist act committed against Israelis meant either sure death or

Unlike past prisoner exchanges, almost all of which involved Arab REAL ESTATE soldiers or Palestinian guertillas captured in battle, Monday's trade TO RENTISHME CHI AT BRITAD was made largely of Palestinians terrorists convicted of murder and

other crimes in Israeli courts. At least 79 of the men freed were. directly responsible for killing Is--m > asp. rachis and 380 of them were serving le sentences. Not only were these : LICUTIVE STRAIGE men exchanged, but about 600 of them were allowed to go free inside Israel and the occupied territories.

"It is a milestone, if not a turning

tween Israel and the terrorists," wrote Yoel Marcus, a political af-fairs analyst for Ha'aretz, a daily fairs analyst for Ha'aretz, a daily newspaper. "Until now it was accepted that an Israeli soldier going into battle knew from the outset, and without any doubt, that if he was taken captive, Israel would do everything to bring him back alive. This very knowledge was a source of strength to Israeli soldiers."

Now, continued Mr. Marcus, "the Arab terrorist who embarks on an operation against Israel will enjoy the same sense of confi-dence," because "he knows that those who sent him will do all they

can to obtain his release." The terrorist who operates in Israel, Mr. Marcus said, no longer risks ending his days as a criminal in an Israeli prison.

Why did Israel agree to pay such

a price for so few men? Analysis have many explanations. First, according to Ariel Merari, an expert on terrorism at Tel Aviv University, Israeli decision-makers made "the grave mistake" of meet-ing with the families of the Israeli soldiers who were in the hands of the Palestinians. Not only did they meet with them once, they met them regularly over the last three years and, according to Mr. Merari, became too emotionally involved in their cases and lost sight of the

wider issues at stake. "It created a direct emotional ressure on the decision-makers and deprived them of the necessary national perspective needed for conducting policies," Mr. Merari

Mr. Gazit seconded this assessment: Look, we have already lost 650 boys in the Lebanon war. I understand the feelings of the fam-

For MX

Reagan Offers Compromise to Foes in Congress

By Steven V. Roberts New York Times Service
WASHINGTON — The Reagan

administration has offered a com-promise on the MX missile that would temporarily limit deployment to 50 weapons.

That offer Tuesday, in response to a rising chorus of complaints about the huge missile, would leave exactly half the administration's originally proposed number.

Thus, the administration was conceding defeat, at least for now, in its efforts to field a full MX

force. But the White House wants to leave open the possibility of re-questing more missiles in the fu-ture, in case arms control talks break down and tensions with the Soviet Union rise.

"What we're trying to say is, let's pause at 50," said an administration official, "Then let's look at it again in a year or a year and a half. Let's see if we need to go beyond

was prompted by a growing oppo-sition to the missile on Capitol Hill and a clear possibility that Con-gress would impose a much stricter limit on its deployment.

The Senate, which is considering a bill authorizing numerous mili-

tary programs, took up Tuesday an adment that would restrict total deployment to 40 weapons, and most vote counters gave the proposal a good chance to pass.

Senator Sam Nunn, who sponsored the 40-missile limit, said of ibes of the captured soldiers. But the administration: "I'm sure they we would have been doing a lot must feel the possibility that their more for the families, all the families of Israel, if we had told Ahmed wouldn't be negotiating." wouldn't be negotiating."

The Georgia Democrat, who is a leader in the Senate on military issues, said he had a "negative" reaction to the administration proposal but was willing to consider further offers.

Senator Name said the adminis-50 missiles was not really significant, because the bill under debate contained only enough money to place 50 of the weapons in the field.

Earlier Tuesday the Senate re-

jected a proposal to eliminate all the \$2.14 billion for procuring the MX missile. But the 56-42 vote indicated how strongly sentiment was running against the missile. Supporters of the MX, which is designed to carry 10 warheads on an intercontinental mission, say it

is necessary to upgrade the land-based leg of the U.S. strategic force and to pressure the Soviet Union to bargain seriously on arms cuts. Opponents say it would not per-

form either function because the fixed missiles would be vulnerable the delicate balance of terror. In Tuesday's debate Senator

Gary Hart, Democrat of Colorado, argued for elimination of the weapon and said, "It's not too late to stop this folly, and folly is the right word for the MX."

Barry Goldwater, an Arizona Republican, retorted that the MX "is all we have in this decade" to counter a continued buildup in Soviet strategic forces. He said that all the arguments had been heard before, when Congress approved the

Michael Heseltine of Britain at NATO's meeting of de-

fense ministers in Brussels. NATO ministers agreed on

measures to improve nonnuclear defenses. Page 2.

But one thing is clear: the grow-ing affluence of some in this soci-

Until last year, the agency print-ed the names of every individual in Japan with a taxable income of 10 million yen or more, which at current exchange rates is about \$40,000. In 1972, for example, 30,000 made that list. In 1983, 520,000 qualified, and the tax agency changed the system to record only those who paid more than \$40,000 in taxes. This year that totaled 68,000 people.

Because the list is based only on declared taxable income, and tax have shunned conspicuous conrates vary, it is difficult in some sumption, not only as vulgar but as

sparks complaints about national tax policies. Japan, like the United States, requires people with more money to pay a higher tax rate. The rates range from 10.5 percent to 70 percent of income.

This year, however, is the first in several that the government is actively considering tax changes, both as a way of increasing govern-

ment revenue and encouraging domestic consumption. The most dramatic plea for lower taxes came from the hospital bed of Konosuke Matsushita, the 90-yearold founder of the Matsushita Electric Industrial Co. and the man

He paid the government \$3.7 million out of an income estimated to be about \$5.6 million. "High taxes like this would have triggered a social revolt" a few hundred years ago, when a citizen's

only recourse to stiff taxes was armed rebellion, Mr. Matsushita said from a private hospital room where he now lives. The hospital is close to the Osaka headquarters of The red bat of a cardinal has

day by the Senate. From a fiscal perspective, the debate is more important than ever. Of President Ronald Reagan's \$329 billion, four-year buildup in military spending, \$191 billion, or more than half, has gone to research and development or buying weapons. Those accounts now represent 47 percent of the military budget, the highest such proportion since World War II.

The cost of obtaining the goods and services may be so high partly because the Defense Department buys in a way nobody else does. tolerating larger payrolls, using more stringent pecifications, relying less on competitive bid-ing and providing special financial incentives.

number of competitively awarded contracts increased 12 percent last year. The Pentagon says, clude their labor costs in Pentagon contracts, however, that competition is not practicable for the critics say, adding that layoffs are less fre-

higher productivity, better management and more effective incentives for economy. They argue that high costs stem from excessive labor and management costs that the Pentagon knowingly allows and sometimes even initiates.

The largest part of the procurement budget is the cost of labor, and executives and employees of military contractors are often paid more than their counterparts in other industries. Profits are The Defense Department says it has made calculated largely on the basis of a contractor's progress on solving many of the problems cited costs; and critics say the practice encourages by the critics. For example, top officials say the

Military contractors try to find ways to in-

ities and athletes.

on a program than private industry would use because it cares more about a product's performance and reliability than it does about costs. according to Pentagon and industry officials. Pentagon planners are re-examining the value of cost-cutting incentives that have produced disappointing results and are looking for ways

to apply labor productivity standards. Questions have been raised about some of the best-managed contractors and the longest-running programs. One involves the Wichita operations of the Boeing Co., a highly regarded air-craft manufacturer that is the fifth-largest military contractor. Boeing has invested \$500 million to increase productivity in Wichita, yet the Air Force, which has reimbursed the company for much of that outlay, concedes that no net

saving has resulted. "We're subsidizing waste," declared Senator Charles E. Grassley, an lowa Republican and a leading conservative critic of Pentagon spending practices.

"The secretary of defense is trying to fix the system," said Derek J. Vander Schaal, the Pentagon's deputy inspector general. He added that his office had received strong support from Defense Secretary Caspar W. Weinberger, even as it delivered unfavorable reports. In pinpointing the cause of the problems, Mr.

dora group of Latin American countries, which have been trying to reach a settlement of regional conflicts

U.S. and Honduran officials have been involved in discussions since August in which the Central American country has argued for a separate security agreement be-tween the two countries. Such an agreement had been sought as a guarantee of U.S. assistance in the event that Honduras was attacked, whether President Reagan was in office or not.

U.S. officials opposed such a measure because it would have mandated assistance under any circumstances. One American concern was that the United States would be obligated under such an agreement to aid Honduras in a conflict that did not involve Nicaragua, such as the 1969 "soccer war" with El Salvador.

The brief White House talks between the two leaders came amid attempts by the Honduran Army to relocate Nicaraguan rebels to sites away from the Nicaragnan border. While administration officials have said that this move would impede the rebels' fight against the Sandinists, President Reagan did not voice this concern in the talks, a senior aide said later.

President Suzzo would not comment on the issue. He also avoided a direct response to a statement Monday by a senior administration official who said that the relocation effort had been related to the rejec-tion last month of the \$14-million aid request for the rebels.

The view presented Monday by the senior American official, who declined to be identified, contradicted statements that have been made by senior diplomatic and military officials in the U.S. Embassy in Honduras.

The embassy officials said last week that the decision to remove the rebels had come after the Sandinists had mounted an attack into Honduran territory, using artillery and 200 troops. Other sources said Honduran authorities felt the presence of the rebels along the border

Military agents backed by soldiers assault a suburban Manila apartment building after a five-hour siege of an alleged "safehouse" of the New People's Army, the military wing of the Communist Party. A soldier and an occupant of the building died in the siege.

Israeli Experts Condemn Exchange Of Prisoners as Grievous Blunder

charged with passing military secrets to the Soviet Union. The Federal Bureau of Investigation has said evidence found earlier indicated that the son might have been the source of some of the secret documents. An FBI official, Bill Baker, asserted that the elder Mr. Walker's spying "could have been going on for as long as 15 years or longer," well before he retired in 1976 from active duty in the navy as a chief warrant officer who, with a top-secret clearance, handled coded material.

Sudan-Egypt Pacts Reported Broken

JIDDA, Saudi Arabia (AP) — The Sudanese prime minister, Gazonii Dafaa Allah, was quoted Wednesday as saying that his country would abrogate accords signed with Egypt under the previous government.

In an interview published in the English-language newspaper Smdi
Gazette, Mr. Dafas Allah said that Sudan and Egypt enjoyed a "special
relationship," but that accords signed during the presidency of Major
General Gazfar Nimeiri "did not reflect the will of the people."

"We consider them null and void," Mr. Dafaa Allah said. He did not specify the accords to which he was referring, but the major agreements include a confirmation of Sudanese support for the Camp David accords between Egypt and Israel and a treaty calling for greater integration between Sudan and Egypt. Major General Nimeri was overthrown April

Later School Start Is Advised for Some

By Nicole Simmons

New York Times Service NEW YORK - At a time when many Americans have been sending their children to school at an earlier age, a growing number of parents are deciding to have their children start school a year later.

They have been following the advice of a group of educators who say that many children who have academic problems in later years could have avoided them if they had simply started kindergarten at, say, the age of 6 rather than 5.

Led by Louise Bates Ames, associate director of the Gesell Institute of Human Development, a private research center in New Haven, Connecticut, these educators say that children should be placed in school based on what Dr. Ames calls their behavioral rather than chronological age. Dr. Ames, a child psychologist, and other pro-ponents of the idea say that because children mature at different rates, how old they act should be more important than how old they

"Little bodies are not geared for academic tasks," which, more and more, are required in kindergarten, said Marie Williams, a psychologist with the school system of Fairfax County, Virginia. No matter how bright, she said, some 4- and 5 year-olds may not be socially ready for school, physically coordinated enough to handle the paper work or patient enough to sit still at their

The air force will reimburse One opponent of the concept is Samuel G. Sava, executive director of the National Association of Elementary School Principals, who contends that making pupils repeat a grade "is the easy way out."

creased productivity and expansion to enable the company to take on additional work." The movement to hold back some young children comes at a time when educators like Gordon M. Ambach, New York State's education commissioner, would like to see children enter school at an earlier age.

Mr. Ambach says that research rates, a few inches a day. on formal classes for 4-year-olds, which have been available on an from this type of investment are experimental basis in New York not reflected in lower costs, but state, "shows that these programs rather in improved performance or are very effective and that the results last." He conceded, however, that dif-

Defense Scandals: A Cure

"I'm tired of reading about the scandals, and I'm tired of going home and apologizing that only intensifies the bureaucratic bindfor them," fumed Senator Dale Bumpers of Arkansas, referring to the way the Pentagon buys weapons. But he and 88 colleagues then voted for a remedy that will change little. The only cure for the disease still seems too radical for Congress. It is called capitalism.

Martin Marietta Corp. bills the Pentagon for golf course fees. The coffee maker designed by the air force for its C-5A cargo plane costs \$7,622. Hughes Aircraft Co. makes missiles so flawed that the air force shut down its production lines last year. All are different symptoms of the same disease - the Pentagon's selfexemption from market forces.

The system endures, however, because of its benefits for the interested parties. Free from the rigors of open competition. Pentagon officials can "gold-plate" and modify weapons regardless of cost. Contractors paid on a costplus basis find that profits rise, not fall, as costs increase. Each year hundreds of officers leave through a revolving door to work for the contractors they cosseted while in office. Congress is the third side of the triangle, submitting to pressure from contractors who promise to create or withhold jobs in states where they need the congressmen's votes.

Congress has tried piecemeal reform, with

weed in the Pentason's swamp of socialism. The true solution is competition, both when a weapon is designed and produced.

The Pentagon says 70 percent of its procurement is competitive. But this is mostly competition in which the Pentagon negotiates with a few favored contractors, then chooses a winner who becomes the sole source of the product. The Pentagon also counts as competitive the perpetual renewal of such contracts.

The new reforms just adopted by the Senate do little to touch the system. They advocate dual sourcing -- having at least two contractors for each weapon and dividing production between them according to annual bids. But the Senate bill permits so many exceptions

that dual sourcing is uncertain to increase.

A better approach is the "creeping capitalism" bill that Senator Charles Grassley Iowa was to reintroduce this week. It would have the Pentagon raise the dollar share of its contracts let competitively, through advertising and sealed bids, by just 5 percent a year, from the present 5 percent on up to 70 percent. That is a prudent approach. Capitalism is strong medicine, and too large a dose could paralyze a patient so little used to it.

- THE NEW YORK TIMES.

Accounting for Inflation

Anyone who knows how much inflation there will be in military equipment costs between now and 1988 is urged to get in touch with Congress, so it will not keep giving the Pentagon more money than it needs. Chairman Les Aspin of the House Armed Services Committee calculates that in four years, the Defense Department has received at least 518 billion, perhaps \$50 billion, extra by over-estimating inflation.

Some error was inevitable; the moderation of price increases surprised everyone. But some was also the result of Pentagon padding

and congressional negligence. Mr. Aspin has flagged a procedure that needs tightening. When Congress authorizes any procurement it includes a cushion for possible price increases. The Pentagon claims it needs a special price index, and it has been consistently high. The miscalculations are not always in the Pentagon's favor. In the 1970s, like everyone else, Defense underestimated the price of oil and had to scratch for funds. What happens when extra cash turns up in a military program? On a request from the Pentagon, it can be redirectfall, with the approval of congressional committees. Otherwise, it is canceled or Pentagon accountants sit on it. No accounting system keeps track of which excess dollars are the result of wrong forecasts.

The Pentagon does not deny a windfall, but portrays it as good news. The transferred bucks, defense officials say, have been put to productive use, buying more bang than originally planned. Many in Congress, however, are understandably annoyed when, as last week, the Pentagon suddenly "discovers" a \$1.6billion inflation surplus it can use to rescue a

program that is about to be cut. These are expensive games. The responsible congressional committees need to scrutinize reprogramming more closely. Mr. Aspin, meanwhile, offers another idea. Rather than fixing the inflation factor when the defense contract is negotiated, he suggests making adjustments after the fact, when the goods are delivered. Why should bad forecasts become a special bonanza for defense?

- THE NEW YORK TIMES.

Castro Loses His Cool

Radio Marti went on the air broadcasting to Cuba on Monday. It is a perfectly legal form of international communication. It addresses what is always the favorite American audience in a communist country, the people who make their own decisions on whether to tune in. It offers them a range of programming, including news about Cuba, that the controlled media do not provide. Congressmen who had earlier feared that this station would be too independent, provocative and strident had largely arred by changes made to be dio Marti under the umbrella of the longestablished Voice of America.

Fidel Castro, himself a leading international broadcaster, lost his cool when Radio Marti opened. Without waiting to listen, he suspended a December agreement under which immi-gration to the United States was to resume, and Cuba was to take back the misfits it shipped to the United States in 1980; he also halted Cuban-American travel to Cuba, Plainly, Mr. Castro could not abide that the station night break part of the monopoly he has tried to impose on the news fare available to his citizens. He knew how to react in a way that would cut at the limited personal choice that remains in Cuba and that would, therefore, pain Americans and build pressure in the U.S. democratic system to kill Radio Marti.

With the Cuban sanctions - and they may

not be the end - there will be an argument between Washington and Havana and between the administration and its critics over whether President Reagan should have started up Radio Marti. We do not see how the United States can leave it to Fidel Castro to determine whether the United States conducts a broadcasting activity that Cuba conducts and that is legal, open and politically valid. As a result of Mr. Castro's rage, some individuals will be hurt. That puts upon Washington a responsi-bility to do what it can politically to bring them relief. The fact is that the arbitrariness of the Castro response and its cruel impact on helpless individuals illustrate precisely the condition Radio Marti is meant to treat.

How? Notwithstanding some foolish early statements by the Reagan administration about going "to the source," the United States put aside the uotion of unseating Fidel Castro decades ago, The Reagan administration's agreement on immigration last year illustrated its acceptance of the consensus — to live with Mr. Castro — that has prevailed since the Cuban missile crisis. Over the long haul, however, it is clearly in the American interest to see Cuba become governed in a more democratic way. This is more likely to happen if the public debate in Cuba is kept fresh by a project such as Radio Marti. No one has to listen.

-THE WASHINGTON POST.

Other Opinion

A Straw in the German Wind

Elections in North Rhine-Westphalia have often acted as an indicator of political swings in West Germany, for more than a third of the country's people live in that state. Chancellor Kohl can therefore draw little comfort from the debacle of his Christian Democratic Party in the recent polls there, especially as the

Social Democratic victor, the charismatic Jo-

hannes Rau, is showing signs of becoming a serious rival to Mr. Kohl at the national level.

The Social Democrats will certainly do all they can to exploit the situation.

-- Neue Zürcher Zeitung (Zurich).

India's New Anti-Terror Law

Criticism of the [anti-terrorism] measure on the ground that it may be used to curb political opponents is misplaced. But the government will be beguiling itself if it thinks it can stop extremists merely by tightening the law.

- The Times of India (New Delhi).

FROM OUR MAY 23 PAGES, 75 AND 50 YEARS AGO

1910: Nicaragua Defies U.S. Protest NEW YORK - Despatches from Nicaragua show that the situation is becoming more serious. General Mena, commanding the forces of the revolutionary party, says that he has surrounded the Government forces near Rama. He says that they may surrender at any moment. The intimation recently made by the American Government that it would not permit the bombardment of Bluefields has called forth a protest from President José Madriz, who contests the right of the United States to make any such prohibition. In spite of the notification made by commanders of American warships at Bluefields that they will oppose the bombardments, orders have been given by President Madriz that it shall begin.

1935: Britain to Treble Its Air Force LONDON - A vast expansion of Great Britain's Air Force, involving the trebling of the number of first-line war planes for home de-fense, at a cost estimated at £30.000,000, within the next two years, was announced simulta-neously to both Houses of Parliament [on May 22] as the British Government's reply to Germany's intention to build up her own air strength in defiance of the Treaty of Versailles. The British announcement was coupled with a stern repetition of the warning that this country will not accept the position of inferiority to Germany in air strength, and a pledge that if the expansion program proves insufficient to match that of the Germans, neither money nor effort would be spared to increase it.

WASHINGTON — A West German with a long background in German-American relations passed through Washington the other day with a postmortem on West Germany's eventful month of May. Bithurg, Bergen-Belsen and the rest of the V-E Day remembrances, the Bonn summit of seven industrialized nations - and the election in the state of North Rhine-Westphalia.

For foreigners, the latter was all but lost in the shuffle of ceremony and acrimony at the time. But from what the visitor had to say, it is likely to have the most enduring repercussions on the Western alliance and German-American relations.

It was a "crushing defeat" for Chancellor Hel-mut Kohi, the worst ever for his Christian Democratic Party in West Germany's biggest state. It was also the third such setback in a row. And his own party is beginning to turn against him.

The question is not whether this spells victory for the Social Democrats in the general elections two years from now (though that would be an unsettling upheaval, given the Social Democrats' leftist, neutralist turn since they were voted out of power in 1982). It is too early to measure the forces that will then be at work.

But it is not too early to measure the forces that will now be at work on Mr. Kohl to reverse the electoral tide. No sooner was the vote in than the chancellor let it be known that farmers, socialwelfare beneficiaries and the unemployed would have to be given a higher priority -at the expense

of military spending.

As the political imperatives are translated into government policies, this would almost certainly mean an inward turning away from matters the Reagan administration professes to care deeply about. One is "burden sharing" in the North At-lantic Treaty Organization. The United States wants the Europeans to do more in the common defense, in part for the weight this would add to the American bargaining position on arms control.

The administration is pushing for a new round of trade negotiations, with special emphasis on the European Community's agricultural subsidies. It speaks of a need for monetary reform (without, of course, conceding that the U.S. budget deficit and the U.S. dollar are a large part of the problem).
On every count, Mr. Kohl's weakness works

against these American purposes. The effect could be catalytic, when you consider what else is going on. Mr. Kohl will be under heavier pressure to bow to public-opinion polls showing about 80 percent of the West German public in favor of a freeze on military spending. But the United States will be in a poor position to cajole when the U.S. Congress is slashing away at defense-spending increases. The U.S.-German example is unlikely to be lost on other NATO members. And the almost inevitable drag on the overall NATO defense effort is unlikely to be lost on the lost of the los ly to be lost on the Russians.

An outbreak of wide-open trade warfare among the Western industrialized nations is never more than a tit-for-tat away. Protectionist fever is already running high in the Congress. Not to be outdone, the administration has rationalized the right to launch a new subsidy program for U.S. agricultural exports that flies in the face of princiagricultural exports that thes in the face of principled opposition to the lavish subsidies offered by the European Community. Secretary of Agriculture John Block has a debating point: By "sending a message," he argues, the United States is increasing the chances that "we'll all come to our senses."

But will the Europeans be sweetly reasonable? The German visitor, who spoke on the understanding he would not be named, suggests that the consequence of the new U.S. subsidies is at least as likely to be a European response in kind: "Any

likely to be a European response in kind: "Any protectionism from the United States would get a strong reaction from West Germany."

This is all the more likely to be the case since the Bonn government was already busy, before North Rhine-Westphalia, blocking efforts within the European Community to scale down the European farm subsidies planned for next year.

The danger of a more generalized trade war must be seen in the light of what the Bonn summit failed to do. Seemingly as a result of French adamancy, the Seven could not even fix a date for a new round of trade talks. But appearances deceive. The French insist the problem is procedural; the subject of talks should be agreed to before a date is set. And the arranda the French contend must be set. And the agenda, the French contend, must go well beyond agricultural trade. Chancellor Kohl

the United States, is always changing governments
— and policies. The likely reverberations from
North Rhine-Westphalia suggest that discontinuity of policy is hardly an American phenomenon. Washington Post Writers Group.

laid low at the summit, letting French President François Mitterrand be the spoiler. But Mr. Kohl will be just as difficult as France" on the question of new trade talks, the West German visitor predicts. That would put a crimp in movement toward monetary reform, as well.

The Europeans never tire of telling America that the alliance cannot operate when its heavyweight,

Radio Martí: Telling Cubans What They Already Know

W ASHINGTON — The Reagan administration is stuck with so many unavoidable problems these days - budget deficits, trade deficits and so on - that it is a puzzle why it insists on punishing itself with addi-

tional avoidable problems. Its latest example of self-inflicted wounds, after the president's tour of the West German cemetery, was its decision to set up an official radio service to tell the Cuban people fourteen and a half hours every day how wonderful life is in the United States

and how dreary it is in Cuba.

As if they didn't know. They have been hearing this news from their families who have escaped to Florida and from the commercial radio stations on the mainland that come in loud and clear to Havana.

Also, the official Voice of America, with its relay stations in the Caribbean, is, with the possible exception of the BBC, the most reliable and detailed source of electronic news in the world, and can be heard from one end of Cuba to the other. (Too bad it is ignored at home.)

Nevertheless, the Reagan administration is spending a bucket to run Radio Marti, named for one of Cuba's greatest heroes of independence. If it had been named Radio Mon-

By James Reston roe to emphasize that the United been surviving by borrowing from States would not permit foreign na-

tions to threaten the freedom and security of the Western Hemisphere, that might have made sense. But calling it Radio Martí was as offensive to Fidel Castro as it would have been to President Reagan if Mr. Castro had started broadcasting to the United States on Radio Jefferson.

The predictable result was that as soon as Radio Marti proclaimed "Buenos días, Cuba," Mr. Castro who has the capacity to jam all U.S. broadcasts with the flick of a switch -announced that he had suspended his agreement with Mr. Reagan to release 3,000 political prisoners and up to 20,000 Cuban immigrants a year. And he canceled his commitment to take back to Cuba the 2,746 Cuban criminals and mental patients

now languishing in U.S. prisons. Well, obviously this is self-serving Cuban propaganda and no doubt Mr. Castro will reconsider after a while. But why, with all the more important things it has to handle at home and abroad, would the Reagan administration get into this silly controversy? Mr. Castro's so-called revolution has been a spectacular failure. He has

ern technology from the United States or elsewhere as best he can and shipping his unemployed as military mercenaries to fight Moscow's "wars of liberation" in Africa when he cannot even liberate himself or his peo-

ple from Moscow's subsidies. Lately, in his declining years, Mr. Castro has begun to wonder about his dreams of leading a communist revolution in the hemisphere. He is still fiddling with it in Nicaragua and the rest of Central America, but recently he has been trying to re-establish diplomatic relations with the major nations of South America in the hope they will lend him the money they do not have themselves.

Mr. Castro is no dummy, despite all his heroic pride and bloated rheto-ric. He knows that Cuba is only 90 miles (145 kilometers) from Florida and a long way from Moscow, whose political and economic philosophy is rejected by every Communist Party that ever heard of the computer.

So why not let him deal with the consequences of his failures and the failures of the Communist system? Why badger him with broadcasts tell-

ing the Cubans that his system is not working, when they know that better than anybody else?

But that is not the way Mr. Reagan sees it. Four years ago, being more interested in propaganda than in po-licy, he decided the United States

stronger than Florida's commercial stations or the Voice of America: more news, more jazz, more information about how pathetic they are under Mr. Castro, and how wonderful it would be if they tossed him to the sharks. Maybe this will work, but the

Cuba what burns they are.

respects uncompetitive, grievously afflicted by class hostilities that belong in the 19th century. Mrs. Thatcher, though, had promised that

austerity, monetary discipline and privatization of industry would bring inflation down, create jobs, and improve Britain's productivity.

Alas, unemployment has more than doubled since she took office. It

is now over three million, in a population of 56 million. One and a quarter million of these are classified as longterm unemployed, and that figure is rising. The latest monthly figure for inflation, for April, registers a 2.17 percent gain, for a 4.2-percent rise since the year began — an annual rate of over 12 percent.

There has been a gain in productivity, but according to a survey of Britain issued in January by the Organiand Development, this was due mostly to labor shakeout rather than real gains in efficiency. The main prob-lem, the OECD says, is "the inefficient use of capital or poor quality of investment." In manufacturing, U.S.

output per employee is three times that of Britain, with less investment per unit of output.

Mrs. Thatcher's defenders can plausibly say that she needs more time. Unfortunately, she has already had more time than most politicians are given to carry out their programs. She has led Britain longer than Ron-ald Reagan has led the United States, or François Mitterrand France. Fair or unfair, the public is impatient. The Pym revolt was chiefly in spired by the social costs of Thatcher

ism. High levels of unemployment are tolerable if policies are getting-results and the outlook for future jobs is bright. If policies are not visi-bly working the electorate rebels. The latest electoral polls in Britain put Labor ahead of the Conservatives, and one of them, a Gallim Poll-published May 16, had the Liberal-Social Democratic alliance ahead as well, with the Conservatives in third place. News like that made it inevitashould grow restless, brew rebellion, and plot for the succession.

The serious consideration, howev-The serious consideration, however, is that in both Britain and France these major experiments in how and the modern industrial economy and society have failed. We are left with the dull, gray, unideological, pragmatic economic and social policies of the center, which, since the first oil shock in 1972, have at least kept the Western ship afloat.

Worse, across the Atlantic, Euro-Worse, across the Atlantic, Euro-

peans now see the Reagan Miracle which the Thatcherite would-be miracle anticipated, and to which the French conservative opposition would dearly like to rally - now begin to look less than miraculous. Perhaps that was not a rabbit after all, that they were sure they saw in the president's hat

The economic indicators have gone off in the United States. Officials from Washington now are asking the's West Germans and Japanese to take the lead — two nations that do not practice Reaganism, Thatcherism, supply-side orthodoxy, or, most certainly, socialism. Both these, in their idiosyncratic ways, are nations of the centrist consensus, doing things the old way, skeptical of miracles. Can it, after all, really be true that there is ao free lunch? What will be the political cost, throughout the industrial West, for broken hopes?

will go into next year's legislative elections with a platform that in ma-jor respects will be no different from that of the conservative opposition. Is it a good thing for radicalism to fail? Many would say yes. I think it not a good thing that the range of political possibility and experiment be so reduced. Two major social and

All Radio Marti will do is to revive the old bogey of Yankee domination — which may be Mr. Castro's last chance of survival.

should have a radio transmitter in Florida to educate the Cubans. Now, thanks to Congress, he has got it.

Maybe he has a point. Radio Marti
will come into Cuba louder and

guess here is that the louder Washington shours the less Havana will listen.

My own silly view is that the only things we Americans have in common with Cuba are geography and baseball, and that, if we could get a Latin American team into the big leagues, as we did with Canada, we might make more progress than tell-

The New York Times.

The TFGQ: Banking on **Blind Trust**

By George Will

WASHINGTON — Remember the reaction to the writing on the wall at Belshazzar's feast? Old-fashioned Old Testament fear took the fun out of the feast. In Ohio and in Maryland there have been episodes like that, involving savings

and loan institutions.

There has been a spurt of panic, some of it reasonably related to the condition of some mismanaged and underinsured institutions.

But there is another and remarkably simple explanation for the kind of panic that can produce runs on thrift institutions. The simple expla-

nation is complexity.

Do you know how your bank works? Sure, you know you rent your money to it. The bank does stuff with it, and makes money, and gives some of it to you in interest and services such as others. and services, such as checks decorated with scenes of Cape Cod.

But that is a pretty sketchy knowledge of something as crucial — if you think about it — as the whereabouts and activities of your money. But, then, you rarely have to think about it, which is something to think about.

Thrift institutions are examples of this facet of modern life: We are surrounded by things we cannot do without and do not understand Banks are not incomprehensible. Bankers understand them - at least some do, somewhat, some of the time. But the rest of us have to take it on faith that the banking system

works swimmingly. We must take much on trust. If we took time to understand everything, we would never get the lawn

A Proper Education

Regarding the opinion column

"When Maturity Comes Late, Put Off College Study" (May 15) by Kenneth L. Woodward and Arthur Kornaber.

Too often colleges and universities

see themselves as institutions that merely provide desired services. This would be fine if entering freshmen, like the returning veterans of World

War II, were mature and knew what they wanted. They do not, and as a result often fall into tracks that do

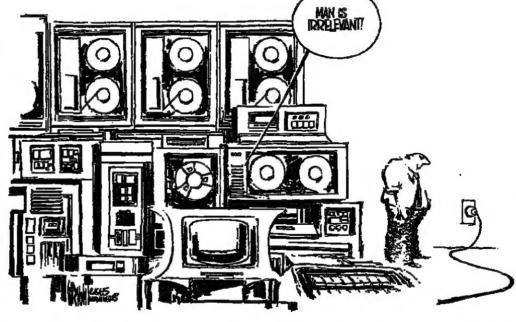

not interest them and do not call

forth their full abilities. Education

If colleges and universities are to

shape, motivate and inspire their stu-

becomes a means to a job.

mower sharpened or the screen door repaired. When that trust begins to crack, it can crumble quickly, producing panic.

A century ago, transportation— say, a horse and buggy—was com-prehensible, in the sense that all the moving parts were visible and un-complicated. Well, all right, the horse was complicated, but you know what I mean. Today we go to an airport, step into a tube of alumi-num, are hurled 35,000 feet up and

3,000 miles along and few of us have the foggiest notion of how a jet engine works or why a plane flies.

In the 19th century, when doctors were loved, they could not do much for patients, other than make them somewhat comfortable while waiting for nature to heal or kill them. Today doctors are vastly more potent. They also are proportionately less intelligible — and less revered. In the 19th century, when, of an evening, a family wanted entertain-

dents. Maturity does not just happen - it comes when people are chal-lenged and provided with an oppor-

tunity to see the world in new and

different ways. By bringing students into closer contact with faculty and

stressing that education is not train-

ing, but learning to work indepen-

dently, colleges can prevent the wast-age of adolescent minds.

Morality and Mortality

dren's Children" (April 12):

ment, it could try conversation (ask grandmother; she can tell you what that was) or books. There was nothing mysteriously technical. Today families stare at devices that bring sights and sounds into their living rooms. Although we are sure there is a reasonable explanation (for the physics of television, not, Lord knows, for the sights and sounds

emitted by it), not one person in 10,000 can do justice to a child who asks, "How does that work?" asks, "How does that work?"

A flourishing economy, indeed a functioning society, depends on the mass of men and women not thinking about a large and growing number of things they depend on in daily life. One measurement of the modernity of the modern world is the TFGQ — the Take-for-Granted Quotient. A crucial (though often

mundane) task of modern govern-ment is to enlarge the TFGQ. Government does this by inspecting restaurants, so customers need

selves in a box hauled aloft by (I am guessing) pullies and cables.

Of course government, as is its wont, often gets carried away and tries to reduce life's risks to zero. Nevertheless, to keep modern society flowing, government must act in many small ways to take large amounts of hesitancy out of life. It does this, for example, when it provides insurance for deposits in thrift institutions. Such insurance reinstitutions. Such insurance removes the drag of anxiety from a crucial social activity — saving.

"We may fling ourselves into a hammock," wrote G.K. Chesterton. "in a fit of divine carelessness. But we are glad that the net-maker did

LETTERS TO THE EDITOR

century now — an ironic fact in view of the Reagan administration's loudly professed pro-life policies.

In 1921, the problem of infant mortality led to the passage of the Sheppard-Towner Act, the first nationally funded health care program aimed at reducing infant and mater-nal mortality. The act remained in force for 10 years and brought health services to mothers and children who otherwise would have gone without. Can we expect such innovation from the Reagan administration?

MARION HUNT.

When Taxpayers Don't Perhaps it would be useful to send Senator Daniel Patrick Movemban a copy of your recent front-page report (May 9) on the 1.5 million Americans abroad who have never even filed a 1040 tax form. Rather than lower the boom yet again on the small minority who regularly pay their taxes, Mr. Moynihan should turn his attention to more pressing matters and leave the productive few to get on with it. CHARLES W. FRIEND.

not make the hammock in a fit of divine carelessness."

Greek Candidates Shun Confrontation In Election Drive

By Henry Kamm New York Times Service

SALONIKA, Greece - A drive along the main roads and byways between Athens and Salonika, Greece's second city, finds candidates for next month's national elections and their supporters in full cry from speaker's platforms on town squares, storefront election headquarters and local coffee-

houses. Yet unlike what happens in most other democratic countries, the Greek campaign for the June 2 election between Prime Minister of the state of th Andreas Papandreou and the op-position leader, Constantine Mitsotakis, does not seem to be a debate in which issues, candidates or rival supporters confront one an-

Speakers for Mr. Papandreou's Socialists and Mr. Mitsotakis's examples. New Democracy Party are ardently critical of the opposing side, but usually in front of crowds that are committed to their cause. No one heckles or asks unfriendly questions, nor do the candidates meet voters at random

With rare exceptions, newspa-pers are so partisan that the other party's views are nearly excluded

from their pages. this in reverse. Reconcil Mr. Papandreou has rejected Mr. That's for the newspapers." Mitsotakis's challenge to meet in a televised debate, suggesting in his reply that each already knows the other's views. State television does broadcast their major speeches, as well as those of Harilaos Florakis, leader of the pro-Moscow Communist Party. Minority parties get almost no exposure.

When Mr. Papandreou spoke Saturday night at a huge rally on the main square of Larissa, the cap-ital of Thessaly, it was as if the Socialists were the only party in town. Their green banners were everywhere, and nothing but enthusiasm was evident. Those planning to vote for New Democracy apparent-

ly stayed home.\ In that agricultural region, the prime minister concentrated on his administration's assertion that it had raised the tural standard of living. He also made reassurances that under a recent law on agricultural cooperatives private property still would be respected and made a promise without specifics to dis-tribute the lands of monasteries and other big landbwners.

If Greek parties campaign like feuding members of a family who no longer speak or listen to one another, the reason may stem from Troops and police have stepped gy followed an escalation of vio-

the enduring supture of the civil war. The war raged from 1944 until 1949 and ended with defeat for the Communists and their allies.

It was followed by a long period of rightist repression of those sus-pected of having supported the los-ing side. That was diminished with the restoration of democracy in 1974 and formally ended with Mr. Papandreou's election in 1981.

But the scars remain, along with an unwillingness to consider the other side worthy of talking.

"We remember the bad rightwing past, with exile, jail, the need for loyalty certificates to get a job or to enter a hospital," one of a group of Socialists said in party headquarters in Kalambaka. The right still has the police-state men-

His comrades agreed, and cited

The opposition dismisses the So-cialist claim to have brought about reconciliation.

The memories of the civil war still divide people," said one of a group in a New Democracy coffee-house in Risomilos, on the road between Volos and Larissa. "Before, the right would not give jobs to the left. The Socialists continue this in reverse. Reconciliation?

Foreign policy was a main theme of the 1981 campaign, with Mr. Papandreou making pledges, since dropped, to withdraw from the North Atlantic Treaty Organization and the European Communi-ty. Foreign policy issues are now rarely mentioned by either party.

Economic issues predominate, with the Socialists claiming credit for reducing inflation, distributing wealth more evenly and providing better health and social services.

New Democracy says that Mr. Papandreou has inhibited growth by excessive state interference in fiscal matters. The party has achieved its most evident appeal by pledging to lift heavy import duties

New Roles Alter U.S. Diplomats' Old Boy System

New York Times Service
WASHINGTON — Before the

era of the Vietnam War, the important relationships inside the State Department and its Foreign Service flowed principally from family background and Ivy League school connections. Then, in the mid-1960s and early 1970s, working on Vietnam or in Vietnam became the central link for the inside power

Now; there is no single network pervading the State Department building, no single set of friends and allies, bonded by common experience, who help one another rise to key posts and who telephone one another on an old-boy basis to iron out, behind the scenes, their bosses'

At present, there are at least four networks, often overlapping: Asia hands, former Vietnam policy people, special assistants and former aides of Henry A. Kissinger, who dominate European issues.

As with most networks, the bonding of these groups occurred early in the members' Foreign Service careers. Unlike most networks, the bonding in the State Department is not based on ideological goals. Most of these officials are lean somewhat to the conservative and try to help each other."

side of policy.

Many of the officials can be found either in jobs on the seventh floor that involve dealing directly with Secretary of State George P.

South Africa's Actions **Pushing Black Unions** To Reconcile Toward More Activism The federation's president, Chris

By Allister Sparks
Washington Prot Service
JOHANNESBURG, South AJ-

rica - A series of actions by South African security forces against members of the newly emergent black labor movement has caused leaders of the movement to identify more closely with black political Until a few months ago the ma-

jor unions had resisted efforts by black political movements to involve them in their campaigns against apartheid. They had reasoned that building up their shopfloor strength was a priority task. But attempts by the government to quell unrest in segregated townships is changing the attitude of the black labor leaders.

Evidence of this change was apparent at the funeral last week of a union official who died shortly after being arrested by the police in the township of Tsakane, 50 miles

(80 kilometers) east of Johannes-Black colleagues of the union official, Andries Raditsela, say they saw a police officer strike him on the head when he was arrested May 4. Later that day relatives found Mr. Raditsela in a disoriented state, lying on the floor of a govern-ment building. He was taken to a hospital, where he died May 6.

Mr. Raditsela, 29, belonged to one of the most determinedly nonpolitical union groups, but the fu-neral it organized for him turned into a political rally attended by

cession and rising black unemplay-ment rate are limiting their ability

The two men were detained without charges for a month before pressure, apparently from the Reagan administration, led to their release. By that time the two organizations, with a combined membership of nearly 300,000, had drawn closer to the main black nationalist organization that is still allowed to operate legally, the United Democratic Front.

Mr. Radiusela's death has given the federation another shove in that direction. The next step could be taken June 8 and 9, when the federation, the council and other major unions will nicet to discuss the possibility of forming a single black labor federation.

SCIENCE

Evidence of Oil Found in Antarctica

LONDON (NYT) - An analysis of sediment from the floor of Bransfield Strait, north of the Antarctic peninsula, has yielded clear evidence of oil deposits, according to researchers on the West German

The authors of the report noted that the area's abundant occanic life continuously earliches the sea floor with organic material. Presumably, the organic matter is then baked by the upward flow of heat in this

volcanic area, accelerating its conversion to oil and gas.

The sediment provides the first "unambiguous geochemical evidence of active petroleum source rocks along the Antarctic continent," the authors

Mysterious Disease Strikes in Brazil

ATLANTA (NYT) — A new and perplexing disorder that affects children up to the age of 10 and is fatal in about 70 percent of cases has been identified in Brazil. A task force of specialists, including some from the Centers for Disease Control here, has been formed to investigate it. The disease does not appear to be transmitted directly between individuals. Although its symptoms resemble those of meningitis, no suspicious bacteria or other claes have been identified.

Ten children in a small town in the state of São Paulo contracted the disease last fall. It began with an acute onset of high fever, vomiting and abdominal pain. Within two days the children developed purpura — hemorrhaging of blood vessels that turns the skin purple. All the children

Investigators who interviewed the families learned that in many cases the children's eyes were infected a week or two beforehand with a contagious form of conjunctivitis. Whether this was related to the mysterious disease is not known. .

Alcohol Called a Prime Killer of Aged

INDIANAPOLIS (UPI) — Death among the elderly is often attributed to "old age," but statistics show that alcoholism is the third leading cause of death in that age group, says a spokeswoman for the Visiting to to the Longity Nurses Service in Indianapolis.

The National Council on Alcoholism estimates that more than 20 percent of the United States's population aged 61 and older are alcoholics. A large number of them turn to alcohol as an escape from problems associated with growing old.

Symptoms such as "falling and breaking of the hip," confusion forgetfulness, changes in behavior, and failing health among the elderly are often passed off as sensitive or as the "natural aging process," said Marcene Blakey-Royster. But these signs might in fact be indications that an elderly person is dependent on alcohol, she said.

Single TB-Leprosy Vaccine Is Sought

BOSTON (AP) — Scientists have used a new technique to isolate genes from the bacteria that cause tuberculosis and leprosy, and they say this may enable them to develop a single, fully effective vaccine against these

Leprosy and inherculosis are caused by similar bacteria. Vaccines now exist for both diseases, but they have major shortcomings.

The researchers' idea is to isolate the bacterial genes that produce proteins that the human immune system recognizes as foreign. Then these genes would be spliced into the genetic material of a harmless bacterium, which could be used as a vaccine. The research was conducted at the Whitehead Institute for Biomedical Research in Cambridge, Massachu-

Raw Seafood: Some Should Abstain

SALT LAKE CITY, Utah (UPI) - People with liver disease or with a weakened immune system should not eat raw seafood, because it could give them fatal blood poisoning, according to a medical researcher. Infections by a common saltwater bacterium from eating contaminat-

ed raw oysters or from wounds inflicted while handling seafood can also cause arthritis, seizures, low blood pressure, confusion, anorexia and vomiting in vulnerable people, said Jeffrey Johnston, of the University of Utah School of Medicine. The bacterium, Vibrio vulnificus, is common in coastal waters, especially in the Gulf of Mexico.

People who have abnormal immune function are at risk for the disease," Dr. Johnston said in an interview. "It's probably easily handled in normal people." But recent evidence indicates that this bacterium, which is related to the organisms that cause cholera, can cause diarrhea in

Maine Lobsters Said to Travel As Much as 100 Miles a Year

By Jeffrey J. Simek United Press International

AUGUSTA, Maine — Some lobsters, often thought of as sluggish creatures of the deep, may cover 100 miles (160 kilometers) or more each year

Many appear to complete a long-distance circuit and return to their starting point, according to Mary Cerullo of the University of Maine Sea Grant College Program, who is at the midway point of a three-year project on movements of large lob-sters in the Gulf of Maine.

"Evidently some lobsters undertake long-distance seasonal journeys comparable, for their size, to those of other Maine natives who go to Florida for the winter," she

In October 1983, researchers dumped into the ocean 1,996 large lobsters specially tagged and marked with a "V" notched into their tails. Cooperating lobstermen report when and where they trap such lobsters, and toss the speci-

men back into the water. Halfway through the project, 379 lobsters have been captured and released — some as many as four

Although most of the lobsters moved 2 to 7 miles from where they were released, 11 percent were tracked an average of 60 miles, in-cluding several that later returned to their original release area. "One lobster released from Sto-

nington, Connecticut, in October 1983, was caught 74 miles south-east the next May," Dr. Cerullo said, "Then it traveled 81 miles north to within a few miles of Stonington before it was recaptured in August 1984."
Some lobsters were found as far

south as Nantucket Island and as far east as Georges Bank, which is believed to be an important breeding ground. As a rule, the larger the lobster, the more distance it cov-

The research seems to confirm.

Images of gods and priests, and inscriptions, are carved on the tombstones found on the island of Sant'Antioco, Professor Sabatino Moscati of the University of Rome

Italian Physicist Pursues Challenges of Particle Accelerators

By William J. Broad New York Times Service

GENEVA — Fresh from win-ning last year's Nobel Prize in physics, Dr. Carlo Rubbia has turned to one of the biggest challenges of his career: creating a new 6.000-person European Laboratory for Particle Physics.

hold the universe together.

His work will have ramifications not only for CERN but also for the future of physics in the United States. One of his proposed ma-chines would, as he put it, "cut a lot of grass" from under a planned U. S. multibillion-dollar accelera-

To some observers, Dr. Rubbia's atom smasher is a gamble that, if powerful enough and built quickly enough, might stop the American proposal dead in its tracks.

in Batavia, Illinois, Fermilab is one of the main contenders for the American machine, the Superconducting Super Collider, whose cir-cular tunnel would stretch up to tor got under way, Dr. Rubbia took 100 miles (160 kilometers) and cost up another technical challenge — a \$3 billion to \$6 billion. detector of unprecedented sensitiv-

March 31, 1934, studied at the eight countries. University of Pisa and Columbia University in New York, and toatom smasher for CERN, the day, as well as working at CERN, teaches at Harvard University.

In February Dr. Rubbia was Dr. Rubbia, 51, recently paused named head of a committee to to outline some of his ideas for new chart the future of CERN, a 13particle accelerators — complex country consortium based outside machines that probe both the infinitely small and the infinitely large, a solid blueprint, and it is widely both the atom and the forces that believed that if he is successful he will win the directorship of the CERN laboratory.

> The roots of his most recent technical triumph go back to the 1970s, when he persuaded Simon van der Meer, a CERN physicist, to resurrect a discarded theory for the production and storage of antiprotons, particles that are identical to protons in mass and spin but that have the opposite electric charge.

His dream was to adapt a 4-mileto others, Dr. Rubbia's machine is less threatening. "Rubbia's technique is to make outrageous statements and then see what gives," said Leon M. Lederman, director of the Fermi National Laborators in Reference of the Section 1. would amphilate each other in a flash of energy and, perhaps reveal new particles.

energetic man of burning ambition. in three years, with \$20 million and He was born in Gorizia, Italy, on the efforts of 130 physicists from

The detector and accelerator were switched on in 1982. In 1983, Dr. Rubbia announced the discovery of the W and Z particles, rem-nants of the cosmic big bang that convey two of the fundamental forces of nature, electromagnetic and the so-called weak force, which accounts for some forms of radiation. It was for this discovery and his role in developing the machine that he won the Nobel Prize with Dr. van der Meer. In 1984 he announced the discovery of the top quark, another elementary building block of nature.

Or Rubbia has now set his sights on an accelerator that outperform not only his proton-antiproton collider but another atom smasher under construction at CERN, the LEP, or large electron-positron collider. (Positrons are the antimatter long circular proton accelerator at cousins of electrons.) With a circular tunnel 16 miles in circumference, LEP is due to be switched on

> One of Dr. Rubbia's main ideas is to put a new accelerator in that tunnel atop the LEP machine, given that the expensive tunnels would already have been dug. The problem would be how to make the accelerator more powerful than

As subatomic particles are

two basic cotions: increasing the only if it came earlier than the U.S. size of the accelerator circle, thus project," said Dr. Rubbin. straightening out the particle pathway as much as possible (the option being pursued in the United States), or employing more powerful magnets to keep a tight grip on increasingly energetic particles.

"The United States has Texas and other large areas so they can talk about 100-kilometer machines," said Dr. Rubbia. But in Europe real estate is expensive, and so the CERN team is focusing on the creation of magnets more pow-erful than any ever before used in particle accelerators.

Magnetic power is measured in units known as tesla. A few years ago at the Brookhaven National Laboratory on Long Island, magnet designers tried and failed to mass produce accelerator magnets of five tesla, at the time the strongest ever for an atom smasher. CERN, however, is looking into

the construction of magnets of eight tesla. "It's something that will require a lot of effort," Dr. Rubbia said. "It's one thing to build a few at home, and quite another to do it commercially.

The construction of such mag-nets would severely test Dr. Rubbia, his colleagues say. Physicists have speculated about putting another accelerator in the LEP tunnel, but it would require great skill to build one as ambitious.

Men's collection

"The proposal is absolutely fanity that could record the presence pushed to increasingly high enertastic," concedes Dr. Rubbia, a big, of the ghostly particles. It was built gies, they increase their resistance bia said, might be able to collide to being turned in a circle, in the protons with a force of 16 trillion way that turning an automobile electron volts or TEV. In contrast, around a corner is easy at 6 mph the U.S. proposal is to build a machine of 40 TEV with magnets To build an atom smasher more of anywhere from 3 to 6.5 tesla. powerful than LEP, a designer has "Our machine would make sense

> The CERN machine might be built by 1992 or 1993, while the American machine would be built in the mid-1990s, he said. He added that the CERN accelerator would be much less expensive, costing about \$300 million, a tenth of the price of the Superconducting Super

With less than half the American machine's power, it might nonetheless walk away with the lion's share of the discoveries, according to Dr. Rubbia.

Similar optimism was expressed by John Ellis, a CERN theoretical physicist. "We'd like a machine twice as powerful," he said, "but I can't convince myself it's worth the extra cost." Dr. Ellis is a leading theorist of supersymmetry, which posits the existence of a group of particles (with names like squarks, gluinos, gravitinos, zinos and win-os) that might be revealed in the energy range of Dr. Rubbia's proposed machine.

At Fermilab, Dr. Lederman disparaged the European proposal, saying a more powerful machine was needed. "I think ours is a such cooperation, he started to dissounder idea because we can get to a higher energy." he said. "You then be free to build. "We could do have to get to a place where you can decisively resolve some of the unpletely different, completely origicertainties we are facing in phys- nal," he said. "There are fantastic

Physicist Rubbia: An "absolutely fantastic" project.

Dr. Rubbia was not deaf to such arguments. He said Europeans would even be interested in participating in the U.S. machine and forgoing the challenge of creating a rival if the terms of the cooperation could be made alluring enough.

new possibilities."

New York Times Service OT since the great Siberian Notation 1908 or the flash recorded over the South Atlantic by a U.S. Defense Department satellite in 1979 has there been an event as stubbornly mysterious as the mushroom cloud that appeared over the sea 200 miles east of Japan shortly before midnight April 9, 1984. It was so close to a Japan Air-

lines' cargo flight, No. 36, that the plane's commander, Captain Charles H. McDade, swerved away from it, began a rapid descent, ordered his crew to put on oxygen masks and radioed a "May Day" distress call.

"Looks like a nuclear explosion, only there was no fireball," he told flight controllers in Alaska. His plane was slightly jostled. "I turned tail and ran," he said later.

The crews of KLM and Flying Tiger airliners, also headed toward Alaska, saw the cloud too. All were flying above a 14,000-foot (4,300meter) cloud deck from which a mated 500 mph (800 kph). The bulb rapidly expanded to a diameter of 200 miles — the distance between New York and Washington — then thinned and disappeared above 65,000 feet.

The Soviet Union had warned of impending weapons tests, but far to the north. Still, the planes, and others passing the area on their way to Alaska, were diverted to Elmendorf what lobstermen have known for decades — that lobsters tend to Air Force Base near Anchorage to migrate farther off shore in search be examined for radioactivity. of deeper and warmer waters in the winter, then return in the spring-None was found. Summer suits:

unbelievable lightness!

Less than 700 grams (22.4 oz.): that's the total weight of an incredible high-summer suit offered by Lanvin.

The secret of this exceptional lightness is that it is made of terital twill woven on authentic silk looms. .Inother advantage of this fabric is that it does not crease.

It makes an ideal suit for travelling, as it washes just like a shirt; by hand or in a machine, it dries in three hours, and it needs no ironing.

It comes in navy, beige, petrol blue, brown or putty, either in town suit cut or with bush jacket. You can also buy the pants separately.

Our longest running season

The starter's gun hasn't sounded yet, but we

know we have a winner. After all, the cast consists of the finest runners, jumpers, vaulters, and throwers in international athletics-many of them worldrecord holders and medalists at the 1984 Los Angeles Olympics.

And for the first time, these athletes will be competing against each other over a 16-meet season that runs from 25 May in San Jose, California, to 7 September in Rome, Italy.

Sponsored by Mobil and organized by the International Amateur Athletic Federation, the IAAF Mobil Grand Prix is a new concept in athletics. In the past, though sports

fans dreamt of great confrontations, the best athletes rarely met each other when the chips were down. Then everything rode on one meet and too often chance victimized talent. Chance—and politics.

But this season, the athletes will be put to the truest test of excellence: consistency at the highest levels of competition.

Grand Prix points are awarded to athletes on the basis of their performances and times. World records gain extra points. At the conclusion of the season, overall Grand Prix titles will be awarded to the outstanding male and female athletes and to the outstanding performers in each event.

It's a programme that will help sustain interest in athletics-among athletes and among fans. Which is one good reason why Mobil is supporting our longest running

Here's the 1985 IAAF Mobil Grand Prix schedule

Although prices in tables on these pages are from the 4 P.M. close in New York, for time reasons, this article is based on the market at 3 P.M.

through the 1,300 level earlier in the week caused a great deal of excitement.

But analysts noted that the average, representing a relatively narrow sample of stocks, was just catching up with other, broader indicators that had already reached new peaks.

"The market has come a long way in a short period of time," observed Newton Zinder at E.F. Hutton & Co. Brokers also noted that interest rates, whose sharp decline helped fuel the recent rally in stock prices, had stopped falling.

Prices of long-term government bonds, which move in the opposite direction from interest rates, were generally lower in the credit markets Henry Kaufman, chief economist at Salomon

Brothers, said in a speech prepared for delivery Wednesday that he believed interest rates would turn upward as the pace of economic activity picks up.

Bank stocks, which have been especially strong of late, ran into selling. J.P. Morgan dropped 1% to 50%; Chase Manhattan ½ to 59%; Bankamerica ½ to 21%, and Citicorp ½ to

The NYSE's composite index lost .99 108.66. On the American Stock Exchange, the market value index fell 1.59 to 230.88.

Kaufman Sees 4% Growth Rate

The Federal Reserve's actions to boost the U.S. economy will produce a growth rate of 4 percent and that will result in higher short-term interest rates beginning in about a month, Henry Kaufman said Wednesday, United Press International reported from New York.

The Salomon Brothers economist said the Fed's recent accommodative posture, most evidenced in its eduction in the discount rate to 75 percent last week, will sour an "economic."

7.5 percent last week, will spur an "economic snapback" that already is under way.

"It would seem that the Federal Reserve will feed a sufficient volume of reserves into the system to eventually ensure an economic re-bound that [temporarily] will produce real growth of 4 percent or more." Mr. Kaufman said in a speech to the National Council of

But that rebound also ensures that the Fed will begin a tightening action to lift interest

WALL STREET WATCH

With Dow Flying at 1,300, Some Are Wary of Hypoxia

By EDWARD ROHRBACH

ARIS — Even with stock prices soaring to new highs this week, many market analysts are not letting themselves be overly affected by the rarified air around 1,300 on the Dow. Goldman Sachs, for example, which refused to get heady in the updraft of sharp rellies last August and January and

was proven right when most gains deflated over ensuing months, maintains a sober, sea-level attitude.

"It's a mature stock market, still providing some opportunity for an advance," said Steven Einhorn, co-charman of the firm's investment policy committee. "But even if that occurs, we think it will be followed by a lengthy topping-out process at levels not too much higher than when the process."

much higher than where we are now He sees stocks "constrained on the upside" by rising interest

rates in the second half of 1985 and "protected on the downside by the massive in-jection of liquidity from the Fed." It has been this action by the Federal Reserve that ignited the current rally, he added, because "a lot of investors who shouldn't have been in cash decided to move out."

solid-state

investors are now 'rethinking' attitudes toward stocks.

With rates falling,

Richard Schmaltz, director of portfolio strategy at Kidder Peabody, thinks that the "biggest surprise produced by this rally could be an awakening of the over-the-counter market." He pointed out that both the Nasdaq index and American Stock Exchange have failed to match the record highs set on the New York Stock Exchange.

With returns from money-market funds and Treasury bills melting as interest rates work lower, he sees retail investors "rethinking" their attitudes toward common stocks. "The move is only modest so far, but picking up," he said, noting that it is individuals who tend to buy the smaller stocks.

Kidder has raised its target on the S&P-500 stock index to 210,

about 10 percent higher than it is now, and up some 10 points from the first week of May when it recommended that equity accounts go from 75 percent to 90 percent invested. Mr. Schmaltz. cited the recent "meaningful and credible" action by the administration and Congress on cutting the federal budget for boosting Wall Street prospects, plus the Fed's "obvious restimulation."

Favorite stocks he mentioned are Digital Equipment, Minnesota Mining, Squibb, Schering-Plough, Celanese and Great Lakes

F Wall Street does continue to surge higher, Philip Roth, technical analyst at E.F. Hutton, commented that energy stocks will probably lose their momentum. Since 1983, he pointed out, these issues have tended to outperform only "whenever the market has been in a flat or down pattern."

A. Marshall Acuff Jr., Smith Barney portfolio strategist, noted that energy stocks have been a source of "amazement and frustration" this year to investors. "Probably voted least likely to succeed in 1985, they have clearly outdistanced the market," he said, pointing out that the group has topped the total-return charts among major stock groups with an 18-percent gain.

Charles Maxwell, senior oil strategist at Cyrus J. Lawrence, thinks it is time to take profits in the group. He warns about "substantial risk of oil surpluses swamping the market." His associate, Frederick Leuffer, added: "The stocks are not cheap on a statistical basis and carry a premium because of takeover

Barry Good, oil analyst at Morgan Stanley, shares this view about weak fundamentals. "Trading-oriented investors should sell into strength," he said.

However, Russell Miller, who follows the industry for Alex. Brown & Sons, accepts that energy stocks may slip near term, but likes the long-range outlook. "The risk of continuing to severely underweight energy sectors of the portfolio in face of this major restructuring (by companies) exceeds the potential reward of waiting for a possible pullback in these stocks," he said.

Oil stock investments have also been considered unattractive

Durables

First Increase In 3 Months

WASHINGTON — Orders to U.S. factories for durable manufactured goods rose I percent in April, the first increase in three months. the government reported Wednes

day.
The Commerce Department said orders for durable goods, items expected to last more than three years, totaled \$100.7 billion in April, a gain of \$1 billion from the March level.

In March orders had fallen 2.7 percent following a 2.8-percent February decline. While orders rose 4.1 percent in January to a record high of \$105.4 billion, this was only a 1-percent advance from the level reached in March 1984 because orders have generally been weak the past year.

The setbacks underscore the weak performance in the industrial sector. U.S. industry has been battered by foreign competition both at home and abroad with sales shumping because of the strong val-ue of the dollar.

The government on Tuesday re-ported U.S. economic growth for the first three months of the year reached an annual rate of only 0.7 percent, the slowest pace since the ed of the last recession.

Many economists have expressed concern that the United States could be in danger of tum-bling into another recession. However, interest rates have been dropping in recent weeks and some analysts think these declines will be enough to spur further growth in the economy.

The Commerce Department re-

port said the 1-percent April increase came from gains in orders for transportation equipment and primary metals such as steel that offset a large decline in machinery

Orders for military capital goods rose 6 percent in April following an even larger 32.5-percent March gain. The increase put April orders at \$6.6 billion.

Orders for nonmilitary capital goods declined 6.9 percent following an even sharper 7.8-percent drop in March. This category is considered to be a good indicator

date for the European Community issue is July 8. The issue is callable after six months at par and at every

payment date thereafter. The reof-fer price to the co-managers is 99.925 percent.

The issue will be listed in Luxembourg. Size of denominations was left open but will be large, Credit

The new issue is a refinancing of an early redemption at its principal amount of a \$1.8-billion FRN

which paid 1/8 point over the London interbank offered rate.

Credit Suisse said the payment

Orders Up How a Controversial Contractor In U.S. for Built a Business Empire in Egypt

By Judith Miller New York Times Service CAIRO — When Anwar Sadat was president of Egypt, Os-man Ahmed Osman, Egypt's richest businessman, was never far from his side. It was Mr. Osman — entrepreneur, banker, self-proclaimed builder of the Aswan Dam — who accompa-nied Sadat on his historic trip to Jerusalem in 1977. It was Mr. Osman who watched videotaped movies with him late into the night. And it was Mr. Osman who helped Sadat promote

Egypt's reopening to private en-terprise and to the West.

So when Hosni Mubarak be-came president after Sadat's as-sassination in 1981, many Egyp-tians predicted Mr. Osman's fall

from grace.
But that has not happened. Although he is no longer minister of construction or a confidant of Egypt's leader, Osman Ahmed Osman remains powerful, and probably the most famous Egyp-

He still effectively controls, as "life honorary chairman," the Arab Contractors Group, a sprawling network of private and public-sector companies, the most important of which he founded 36 years ago. Arab Con-tractors Co., as it is still called, achieved renown as one of the builders of Aswan Dam.

Last year, the entire Arab Contractors Group secured \$684 million worth of construction projects, one-third of all projects awarded here. Some of the contracts were subcontracted to private companies owned or controlled by Mr. Osman. That business practice — allowing Mr. Osman, the public servant, to funnel business to Mr. Osman, the private subcontractor - is controversial but legal in Egypt, where the public sector still accounts for at least 70 percent of domestic production.

tional projects. Mr. Osman is also a member "Egypt needs a vigorous pri-

Osman Ahmed Osman

of Parliament, serving on the influential housing committee. And he is chairman of the ruling National Democratic Party's popular development commitee, at the same time he maintains close ties with Egypt's major opposition party, the Wafd. Indeed, the 66-year-old Mr. Osman has been agile enough to prosper throughout Nasser's socialism. Sadat's capitalism and Mr. Mubarak's policy of moderation. It is a durability the business community attributes to his political and business acumen. But it also reflects the extent to which Egypt - with its underpaid, unmotivated government bureaucracy - must rely on private concerns to carry out na-

much a catalyst for Egypt's private sector, Mr. Osman said he has established more than 200 companies and 26 banks. Mr. Osman's business practices do not go unchallenged in Egypt. Mohammed Heikal, for

Shell Reports 10% Increase in 1st-Quarter Net

By Bob Hagerty International Herald Tribune

LONDON - The Royal Dutch-/Shell Group, citing buoyant gas sales and the strong dollar, reported Wednesday a 10-percent increase in first quarter net income. But the British-Dutch group, the

world's second-largest oil compa-ny, warned that oil prices are vul-nerable to a further decline in coming months.

Net rose to £1.08 billion (\$1.38 billion) from £982 million in 1984's first quarter, when net soared 93 percent from a year before. Sales grew 15 percent to £17.51 billion from £15.28 billion.

the London Stock Exchange at 716 pence, down from 720 pence Tuesday. On the Amsterdam Stock Exchange, shares of Royal Dutch Petroleum closed at 206.10 guilders holders has delayed the move. (\$60), up 1.30 guilders.

Because oil is priced in dollars, the rise of that currency from yearearlier levels bloated the value of inventories in pound terms. Strip-ping out this distortion, the group showed an underlying profit decline of 1.6 percent.

But David Gray, an analyst at the London brokerage of James Capel & Co., said that figure was "a lot better than it looks." He pointed to two big exceptional items: a £50-million provision to cover the cost of restructuring unprofitable metal operations and a currency-translation loss of £75 million. That loss reflected the decline of the dollar from the end of last year, which lowered the pound value of the group's dollar reserves.

Because the dollar remained well above year-earlier levels, however,

first quarter. In addition, crude oil production rose 2 percent to nearly 1.66 million barrels a day.

Natural-gas sales surged 12 per-cent to 8.04 billion cubic feet a day as cold weather boosted demand in Western Europe.

Net income at Shell Oil Co., the U.S. unit, fell 9 percent in dollar terms. The contribution to the group's profit in pound terms, however, grew to £219 million from £156 million. Aside from the cur-rency benefit, the increase reflected the rise in the group's stake in Shell Oil to 94.6 percent from 69.4 per-

Sir Peter Baxendell, chairman of The results were in line with fore-casts. Shares of Shell Transport & Shell Transport, said at that com-pany's annual meeting Wednesday that the group appeared close to success in its effort to raise its shar-

Sir Peter also said the glut of crude oil could depress prices fur-ther this summer unless the Organization of Petroleum Exporting Countries again reduced output. The price of North Sea Brent blend already has declined to about \$26.50 a barrel from nearly \$29 in late January.

Many oil analysts expect worldwide demand this year to show only a slight rise from 1984. "At best, prices will stay where they are, said David Johnson, an analyst at Wood, Mackenzie & Co., "and there is a downside risk." Even so, he added, "I wouldn't have said they were about to collapse."

For the full year, Wood Mackenzie forecast that Royal Dutch/Shell would report net income of £3.66 billion, up from £3.65 billion in 1984. Capel's Mr. Gray predicted the pound value of the group's oil net of £3.75 billion.

Fallout From Pickens-Unocal Fight Is Clouding Other Bids By Mark Potts Washington Post Service Court last Friday. The ruling Stopped Mr. Pickens's efforts cold on Pickens," said A. Gilchrist think this means some change." Pickens's days as the scourge of the financiers by rewriting some of the financier

vate sector," Mr. Osman said in

one of his infrequent interviews.

Dollar Is Mixed In Europe Trade

The Associated Press

LONDON -- The dollar turned in a mixed performance Wednesday in quiet, trendless European trading amid indications that U.S. economic growth was slowing. Gold prices were also mixed.

Foreign exchange dealers said remarks by Henry Wallich, a U.S. Federal Reserve Board member, that the economy was sluggish rather than heading for a recession strengthened market belief that interest rates may fall, making the dollar less attractive to investors.

In London, the pound was quoted at \$1.265, down from \$1,2722 Tuesday. In Tokyo, the dollar closed at 250,525 yen, up from 250.15 year the day before.
Other late dollar rates compared with Tuesday: 3.072 Deutsche marks, up from 3.053; 2.5865 Swiss francs, down from 2.5975; 9.375 French francs, up from 9.312; and 1,962.90 Italian lire, up from 1,951.50. In Zurich, gold was quoted at a late bid price of \$316.75 an ounce, up from \$313.50 Tues-day. In London, it fell to \$316.50

The issue, which was called nal debts incurred by governments Wednesday, was launched in June, prior to 1949.

LONDON — The European Community will issue a \$1.8-bil-lion, five-year floating-rate note paying 1/16 percent over the Lon-don interbank bid rate with a minimum coupon of 5 percent, the lead manager, Credit Suisse First Bosit was going to make an early repayment of the 4-billion European Currency Unit loan raised on its by a consortium of 10 international banks led by Deutsche Bank, West France appounced last week that Meanwhile, China on Wednes-day made its first foray into the Eurobond markets since the Com-

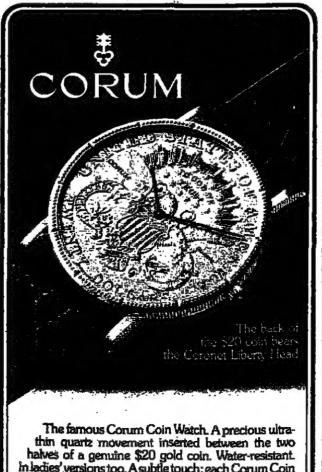

Traders later said that the issue was quoted at 99.88/90 percent on was quoted at 19,56/30 percent on the gray market, which is just below difficult to set the bond's interest the 99,925 percent price at which it rate, which signals a borrower's is being reoffered to co-managers. Credit rating since there was nothing comparable on the market to at around 100.

3 Olivetti Forges a Bold New Tie With Japan's Toshiba

Analysts Foresee Emergence of a Powerful 3-Way Alliance, Bringing in AT&T

By John Tagliabuc

BONN - An accord announced last week between Olivetti SpA, the leading European office automation group, and Toshiba, one of Japan's largest electrical and electronic companies, has sparked speculation of an emerging arrangement that some experts say could produce a powerful new alliance in world electronics.

Under the agreement, Toshiba Corp. will get a 20-percent stake in Olivetti's Japanese subsidiaries. The companies also said that they would "consider cooperative business activities in broader fields in

both Japan and Europe."

Olivetti began weaving a net of international ties in 1983, when American Telephone & Telegraph Co. invested \$260 million for a 25percent stake in the company in an accord intended to open European markets to AT&T products.

Only recently, however, AT&T has been holding intense discussions with Japanese companies, including Toshiba, in an effort to sell its telephone-switching equipment and office computers in Japan. fits that a triumvirate of American, European and Japanese partners

Toshiba, with its huge Far East-ern sales force, would help Olivetti attain the volume it would need to keep unit manufacturing costs down. Olivetti's leadership in the office, in turn, would ease Toshiba's efforts at expanding its tradi-tional line of industrial and consumer electronics into office automation.

Both companies, by this line of thinking, would profit from AT&T's excellence in networking the systems that link a company's computers and communications.

"It makes sense to pool your re-sources," said Philip de Marcillac, a London-based analyst at IDC Europa Ltd. "This is certainly the direction the industry is taking."

Officials at all three companies gains us credibility." he said. "The worth about \$300 million to the deny the recent accord is related capital share signals that it's a longdirectly to three-way cooperation. term relationship.

Jun Kobayashi, Toshiba's senior Both companies managing director in charge of in-dustrial relations, insisted the sales of Olivetti products, such as in 1984, largely as a

that off."

Mr. Piol gave several reasons for new product developments.

Olivetit's latest stab at the Japanese market.

Under the agreement with AT&T, according to Vittorio Levi,

Basically the reasons were to an Oliveti vice president, the Ital-in a channel of distribution that ians will ship personal computers

edge the potential for wider-reach- products, such as facsimile equiping arrangements.

"AT&T was informed in every Olivetti's European markets and

spokesman for AT&T Internation-al, asked about the potential for cooperation, replied: "I don't want most important overseas market afto speculate, but I would not write ter the United States as a source of . revenue and a listening post for

of total production, and will buy Both companies, he said, would \$70 million worth of AT&T's 3B

in 1984, largely as a result of agreement had "nothing to do with personal computers, in Japan, and sales to AT&T; net income of Oli-AT&T." But the officials acknowl- for increased shipments of Toshiba vetti's parent company jumped 69 percent, to the equivalent of \$110 million, on a 36.2-percent sales in-crease, to \$1.18 billion. Group sales single step," said Elserino Piol, Oli- East Asian markets outside Japan. rose 22.4 percent, to 52.13 billion, vetti's executive vice president for Olivetti's Japanese unit, with an-strategy. Richard Gundiach, a nual sales of about \$83 million. Is table improvement" over 1983 net table improvement" over 1983 net group earnings of \$137 million.

Still, the Olivetti computers AT&T sells have been also-rans in the hard-fought U.S. market, prompting Olivetti officials to grumble about AT&T's lack of marketing aggressiveness.

To increase deliveries, Olivetti

signed an accord earlier this year

with Xerox Corp. to supply word processors as part of Xerox's range of new office products. Analysts doubt, however, that Xerox will fare much better with the product. For its part, Olivetti has been no slouch in searching out fresh out-lets. In February, Olivetti put up \$11.3 million for a 49.3-percent stake in Acorn, the British microcomputer maker, in an effort to become a global player in the world microcomputer market, and thickened its already dense European up Exxon Corp.'s office systems business and Start Computer Cen-ter GmbH, a Munich-based chain

of retail computer shops.

Olivetti already holds a controlling stake in Italy's Bit Shop computer chain, and minority shares in Britain's Tab computer shops and Microsge in the United States. That sales clout, some analysts

say, plus Toshiba's components and the switching systems AT&T can supply, may be the formula Olivetti pursues to keep ahead of giants such as International Business Machines Corp., which is de-veloping similar office hookups with Rolm Corp., a subsidiary.

from a year earlier after a 9.9-percent year-to-year rise in February. Business and Politics Mix for Egyptian Contractor

Japan Industrial Output Jumps 9.9%

TOKYO — Japan's unadjusted industrial-production index rose 9.9 percent in the fiscal year ended March 31, compared with a 6.4-

percent gain in the previous year, the Ministry of International Trade and Industry said Wednesday.

The producers' shipment index rose 7.4 percent following a 6-percent increase the previous year, while the index of producers' inventories increased 6.4 percent after a 5.2-percent fall in 1983-84.

The revised March index was down 1.4 percent from February, which followed a 0.1-percent decline from January. The ministry said it had made an annual supplementary revision for all the earlier 11 months in 1984-85 ended March 31.

Before the usual year-through revision, the adjusted February index was up 0.8 percent from January, it said. Unadjusted, the revised March index was up 5.2 percent from a year earlier after a revised 5.9-percent February year-on-year gain.

The revised and adjusted March producers' shipment index fell 1.8

Unadjusted, the revised shipment index was up 2.7 percent from a year earlier following a 3.8-percent year-on-year February gain.

The adjusted March index of producers' inventories of finished goods rose 1.6 percent from February, following a 1.7-percent rise

The revised and unadjusted inventories index was up 0.8 percent

The March figure is measured against re-revised February.

percent from February and 0.8 percent from January.

ractors.

major industries, including Mr. Osprofits and socialized his debts.

But despite the criticism, Mr. Ospan is a national figure who enjoys

man's company. "I said OK," Mr. Ismail Osman dismisses this company is a national figure who enjoys.

Osman recounted. "But I told him I characterization of his nucle's business." wanted to complete the dam on ness practices as "utter nonsense." similar charges, he said, have alment red tape." So Nasser apways been leveled by those he proved a law enabling Arab Contermed "jealous competitors." He tractors to operate more like a insists that Arab Contractors has 10," said Mr. Osman, flipping an ash from his giant cigar.

Nasser may have belped make first-class soccer team plays.

Mr. Osman what he is today, but he was re-elected chairman of the mr. Osman is also a self-made apparently there was little love between the two. In his autobiography, "My Experience," published in 1980, in Arabic, Mr. Osman writes that Nasser frequently harassed him, and even unjustly jailed him for a few days on charges of

spying for Israel.

Mr. Osman was more compation free enterprise enabled private business to flourish. Sadat's economic programs created a class of nouveau riche Egyptians, somewhat in the mold of the pioneering Mr. Osman was more compatible with Sadat, under whose presidency he built up his empire. In establishment circles. Mr. Osman nouveau riche Egyptians, somewhat in the mold of the pioneering Mr. Osman was more compatible with Sadat, under whose presidency he built up his empire. In establishment circles. Mr. Osman make for a damentalist groups only indirectly, for example, through contributions construction for four years in the for example, through contributions 1970s, Mr. Osman canceled a law to mosques. But both Arab and Mr. Osman, who founded his Arab Contractors Co. in 1949. "I started with an office in Ismailia, my home private firm from receiving more than \$100,000 annually in government contracts. Using the basic didn't have enough money to pay a statute of Sadat's "open door" processible in Egyptian offices.

Today, Mr. Osman is spared such humble tasks. He would not Thus, Mr. Osman now has hold-

ings in food production, industry, construction, banking and insurance, hotel services, medical care, and engineering services — many of them doing business with state entities. These companies, together with Arab Contractors, employ more than 200,000 people, says Ismail Osman, who estimates the group's combined assets to be about \$2 billion.

> of Mr. Osman's operation is the almost fanatical loyalty he commands from employees, the result of what Ismail Osman calls "sound management." The Arab Contractors Co. employees are public sec-tor workers, and hence underpaid, but Ismail Osman says they earn three to four times their salaries in bonuses. "Ten percent of whatever is saved on a project is distributed to workers," Mr. Osman said. And all companies in the Arab Contractors' network offer extensive benelits: A well-endowed pension fund, scholarships for employee children, athletic programs, a company hospital and free training for engineers. "This is how we keep the best people," he said. "We're private

Perhaps the most impressive part

sector in spirit." Perhaps 2 bit too private, say many of Mr. Osman's detractors. They argue that he has used his public sector affiliation to subcontract work to his private concerns that in turn make healthy profits. sometimes leaving Arab Contractors with cost overruns. Such over-runs, they add, are usually subsi-dized by the government, since

company. Thus, Egyptian busimen say, a common charge is nationalized Egypt's banks and that Mr. Osman has privatized his

Despite the debate surrounding Mr. Osman, there are few signs that two years ago, his second son married the daughter of Abdel Azim Loukma, a prominent leader of the Moslem Brotherhood, a frindamen-

talist religious group.
His longstanding financial sup-port for the Moslem Brotherhood and other Islamic fundamentalis to mosques. But both Arab and Western diplomats say the Osmans private firm from receiving more have long provided considerable economic support for the Moslem Brothers and other fundamentalist groups in Egypt to help counter the growth of Communist and leftist groups here.

Such support is deeply resented by many in the ruling National Democratic Party, who see the Moslem Brothers and other Islamic groups as potential threats to Mr. Mubarak's regime.

"Mr. Osman is still playing with religious fire, just as Sadat did," a senior NDP member warned. But neither Mr. Osman nor his nephew, Ismail, appear troubled by these affiliations. After all, said Mr. Osman, his faith was partly responsible for his success. "I succeeded because I believe in God," Mr. Osman said. "All my life I have believed in God, my country and the Egyptian man.

Pacific Telesis Will Extend Reach With Purchase of Dallas Company

Los Angeles Times Service

LOS ANGELES — In a move that will extend its corporate reach across the United States, Pacific Telesis Group of San Francisco announced Tuesday that it would buy Communications Industries, a Dallas-based radio-telephone company, in a cash merger valued at

Communications Industries holds Federal Communications Commission licenses to operate celiniar radio-telephone networks in its home market of Dallas as well as in Atlanta, St. Louis and Tampa-St. Petersburg, Florida. Its licenses also include San Diego and San Francisco in PacTel's home territory.

In a cellular network, a service area is divided into broadcast cells, each with its own low-powered radio transmitter and each connected by computer to the other cells and to the regular telephone network. As a user drives through, the computer switches the call from cell to cell. That allows several callers to use the same radio frequencies simultaneously, greatly increasing the system's message volume be-yond that of a single-transmitter mobile-phone system.

A Pacific Telesis subsidiary, PacTel Mobile Access of Costa Mesa, California, last January bought a 23.5-percent interest in a cellular network to serve the San Francisco-San Jose area — a system in which Cl also holds a 23.5-percent stake. The acquisition, if approved, would double Pacific's interest. However, the FCC has ruled that each market must be served by two cellular radio-telephone systems —one run by phone companies, the other by any other company or combination of companies (the so-called non-wire-line network).

Because PacTel Mobile Access is principal partner in a partnership that built Los Angeles' telephone-company network and is builting another to serve San Diego, Pacific Telesis may have to divest itself of the competing, non-wire-line license also serving the San Diego market. PacTel's interest in San Francisco is only in the non-wire-line

Volvo Profit Down 15% in Quarter

By Juris Kaza International Herald Tribune STOCKHOLM — AB Volvo, the Swedish automotive, energy and food group, said Wednesday that its first-quarter pretax profit fell 15 percent from a year earlier, to 2.212 billion kronor (about \$251 million), from 2.6 billion kronor. The company reported earnings of 634 million kronor in the fourth quarter of 1984.

results compared with an unusually strong first quarter a year ago. At that time, Volvo officials explained, earnings were boosted by large truck deliveries to customers in the Middle East.

Mr. Gyllenhammar did not project Volvo's earnings for all of 1985. But Michael Sjowall, an analyst who follows the company, said the lower first-quarter result had been expected in light of last year's

He predicted that Volvo's earnings in the second and third quarters would be significantly higher than in 1984, when Volvo was af-

nor from 21.687 kronor a year earlier. Car sales rose 8 percent, to Uddevala, Sweden, on the site of a 8.971 billion kronor, from 8.287 shipyard. The plant, which will cost billion kronor in the 1984 quarter. 2.5 billion kroner and have a capac-Truck sales rose 6 percent, to 3.771 ity of 80,000 cars per year, will billion kronor.

Sales in the energy group de-clined 12 percent, to 6.043 billion kronor, the company reported. The company said its European car sales had been weak in the first

quarter, but that this had been off-Pehr G. Gyllenhammar, Volvo's set by high sales of trucks in En-board chairman and chief execu-tive officer, said the first-quarter

The company's managing direc-The company's managing direc-

tor, Hakan Frisinger, said that sharply higher automobile excise taxes and payment restrictions in Sweden would probably reduce domestic Volvo sales by several thou-sand cars in 1985. The loss would not be offset by increases on for-eign markets, be said. Higher excise charges and rules

requiring a 50-percent down payverse private capital outflows that were weakening the krona.

open in 1987.

Company officials said that Volvo had allocated an initial 100 million kropor for site and other preliminary studies for the new

Volvo also announced that it was setting up a program with the Swedish post office and PKBanken, the state-owned commercial bank, to allow Swedes to buy Volvo shares at their local post offices or from rural mail carriers.

Bank Lending Rates Lowered in Venezuela

ment on new cars were part of a CARACAS — Venezuela low-fiscal package announced by the ered commercial bank lending Swedish government on May 13 to rates Wednesday by one point to 14 slow domestic consumption and reinterest rates across the board, the central bank said.

than in 1984, when Volvo was affected by strikes at suppliers in West Germany.

Volvo said sales in the first quarter edged up to 21.809 billion kronounced that they had decided in the first quarter edged up to 21.809 billion kronounced that they had decided in the first quarter edged up to 21.809 billion kronounced that they had decided in the first quarter results and the move was in line with a flexible monetary policy reflecting international interest rate trends and the need to stimulate credit demand, it said.

2 Aircraft Firms Plan Merger

LONDON - Australia's two largest aerospace companies, Hawker de Havilland Ltd. and Commonwealth Aircraft Corp. plan to merge, it was announced Wednesday.

Britain's Hawker Siddeley Group PLC, which owns 70 percent of Hawker de Havilland, said De Havilland would pay cash for the entire issue capital of Commonwealth. The amount of the payment was not disclosed. It said De Havilland would finance the purchase from its own resources and that the merger would become effective June 30, subject to Austra-lian government approval.

Hawker de Havilland is involved primarily in aircraft and aircraft engine overhaul and aerospace component manufac-ture for a number of Australian. British and U.S. military customers. Commonwealth has broadly similar activities. The merged organization will have about 3,300 employees, the an-nouncement said.

Burton Makes Bid For Debenhams

before the contract became bind-

LONDON - Burton Group, the British clothing retailer, an-nounced Wednesday a £455million (\$582-million) takeover bid for the Debenhams department store chain and promised a new shopping concept if suc-

The Debenhams board said the bid was inadequate for the 67-store group, which includes Hamley toy shops and Harvey

The Burton chairman, Ralph Halpern, said the group intend-ed to develop a new "galeria" format for Debenhams involving groups of specialty stores under the same roof. Mr. Burton said it was joining forces with the Habitat Mothercare retailing and furniture group in its bid to redevelop Debenhams. Habitat Mothercare would be given an option on 20 percent of Debenhams, with use of floor space as well as a contract to refurbish the stores. Debenhams's chairman, Robert Thornton, said last week that the group would fight any hos-ule bids.

WestLB Operating Profit Rose 10% in First Quarter

DUSSELDORF - Westdeutsche Landesbank Girozentrale's group operating profit rose 10 percent from a year earlier to 314 million DM (about \$103 million) in 1985's first quarter, Friedel Neuber, management board chairman, said Wednesday. The bank is West Germany's third largest.

He added that full 1985 results provisions against the troubled

DAL, which had losses in the early 1980s, has cost WestLB more than 600 million DM in loss provisions, he said. WestLB had reported earlier that it had to use the bulk of its 1984 record operating profit of more than I billion DM for risk provisions and would not pay a DM profit.

WestLB is DAL's leading share-holder, with a 30-percent stake, and agreed with four other banks earli-

As earlier reported, WestLB had a partial operating profit of 940 million DM in 1984, down slightly from 949 million DM in 1983. When trading results are taken into account, total operating profit fell required by law and that it had 6 percent, to 1.32 billion DM from complained to the panel that over-1.41 billion. But of this, 1.1 billion had to be set aside as risk provisions, only slightly less than 1.2 billion in 1983.

Mr. Neuber said 1984 total opershould not be hampered by further ating profit, although apparently was, in fact, a record because Deutsche-Anlagen Leasing GmbH. 1983's figures were inflated by a 224-million-DM transfer out of a no-longer-required reserve posi-

> The W stLB group reported net 1984 profit of 19.1 million marks, up sharply from 566,000 DM in 1983, while the parent bank declared an unchanged 30-million-

He cautioned that foreign credit risks will continue to be high.

Offer by Bunzl

LONDON — Brammer PLC said Wednesday that it has rejected a £1 19.6-million (\$153-million) bid for the company by Bunzl PLC.

A company said it had not been informed of the takeover bid as

sees British mergers. This bid is unwelcome, unsolicited and unattractive and, in particular, lacks industrial logic. We intend to defend it vigorously and are urging shareholders to do noththe statement said.

The terms of the Bunzl offer consisted of 60 Bunzl ordinary shares and £115 nominal of Bunzl 7-percent convertible loan stock dated 1997 for every 100 Brammer ordinary shares. The cash alternative was 370 pence per Brammer share. Brammer shareholders who ac-

cepted the offer would receive about 14.5 pence per share in gross annual income, based on Bunzl's 1984 dividends and the coupon to be paid on the Bunzl convertible

Reviewed by Jonathan Yardley

SURELY there are few sadder phenomena
in U. S. history after World War II than the
deterioration, physical and psychological, of
New York. At war's end it was, as Roger Starr
writes in this fine book, "certainly the world's
strongest surviving city," one not merely unscathed by combat but possessed of energy,
ebullience, self-assurance and confidence; to
residents and outsiders alike, its prospects
seemed limitless. Now, only four decades later,
it is in decline; its infrastructure is wasting
away, its manufacturing base has shrunk, its
crime is pervasive, its gap between rich and
poor is wider than ever, its housing market is
chaotic.

chaotic.

How it got that way is Starr's subject, in a pungent book distinguished by bluntness and a willingness to face unpleasant truths. Starr, a former city housing commissioner and businessman who now writes editorials for The New York Times, loves his city and is dismayed by its decay, but his feelings do not prevent him from looking at matters with a cool eye. What he sees will seem pretty only to connoisseurs of self-destruction and hubris.

Starr begins with Lincoln's Birthday 1946. Starr begins with Lincoln's Birthday 1946,

when Mayor William O'Dwyer asked the peo-ple of the city to suspend their ordinary busi-ness in response to a strike by tugboat workers — an request that was cheerfully obeyed and that helped bring the strikers to terms. This, Starr argues, was a high moment in the city's history, a demonstration of urban spirit and manners that has subsequently gone virtually unmatched. Since then, Starr writes, there has been a "decline in New York's civility, the custom of treating other citizens with the mini-mal courtesy to which shared status as New Yorkers entitles them."

But basic human decency is scarcely the only area in which New York has deteriorated. One by one, Starr examines those aspects of city life in which New York was healthy in 1946 and is ailing in 1985: its harbor, its mass transit, its manufacturing economy, its schools, its hous-ing supply, its lawfulness, its hospitals and sanitation, its local government, its cultural life. In none of these areas can Starr find cause

Solution to Previous Puzzle

d

世の日本は小なななるなったが

YORK CITY

For optimism: on the evidence, in none of them would he be justified in doing so.

Starr's analysis of the subway system is typical of his careful, unsentimental approach. The subway was in substantial measure responsible for creating New York as it existed 40 years ago: It bound the city together, it made travel from one part of the city to another speedy and cheap (and safe), it brought in the workers who cheap (and safe), it brought in the workers who made Wall Street and midtown thrive. But political commitments to unrealistically low fares eroded its financial base and left the Metropolitan Transit Authority without the funds for reasits and modernization. Rider-Metropolitan Transit Authority without the funds for repairs and modernization. Ridership is sharply down because people can no longer trust the subways to run reliably, because they are afraid of widespread and random crime, because there are fewer manufacturing jobs in the city to which to commute. The result is that subway revenue is down as well, and there is an increasingly likely prospect "that the entire system will come, bit by bit, to a stop."

Starr is every bit as forthright in his exami-

bit, to a stop."

Start is every bit as forthright in his examination of rent control, which he identifies as a critical influence on New York's inability to construct sufficient housing or to maintain its "once-good apartment houses and apartment-house neighborhoods"; of conflicting attitudes toward crime, which demand stern enforcement of laws on the one hand and "humane" treatment of prisoners on the other: of the balkanization of the city school system into a loose federation of warring districts; of the rise loose federation of warring districts; of the rise in dependency and the subsequent institutionalization of the welfare culture.

alization of the welfare culture.

On this last subject, as on several others, Starr argues that the city's liberal elite is largely at fault; he writes that "a society that fails to draw a clear line between the ethic of dependency and the ethic of self-support is doomed to an increase — a continuing increase — of dependency. A society that rewards young women for producing illegitimate children is a society that has failed to draw a line clearly at a vital juncture. Such a line cannot be drawn by government, nor should it. But a society whose elites, black and white, fail to understand that a line should be drawn between moral and

elites, black and white, fail to understand that a line should be drawn between moral and immoral conduct is failing in its duty to the dependent and to their offspring, generation after generation."

This is not a view likely to win Starr much popularity among the fashionable of Manhattan, who are too busy in the pursuit of self-gratification to contemplate the many ways in which they have permitted their city to crumble around them. But there is much truth to his contention that New York is the victim of contention that New York is the victim of nothing so much as its own hubris, and that its failures of self-discipline have the potential to be fatal. If that indeed proves to be the case it will be lamentable, but it will be no one's fault except New York's.

English Doll Auctioned for £15,400

The Associated Press LONDON — A rare English wooden doll made in about 1740 was auctioned Tuesday for £15,400 (\$19,600), Sotheby's, the auction house, said. The 24-inch (61-centimeter) figure in its original green dress, quilted underskirt and corset was sold by Mary Hillier, a doll expert, and bought by an identified buyer.

ON the diagramed deal.

South won and returned a diamond after taking diamond, finessing the nine spades after North had used a driving out the ace. His life became simple when East that, as a passed hand, he held

a strong raise in spades. and the eight was played from dummy. East had a crucial decision to make. The right play was to take the ace and shift to a club, thereby defeating the

contract in the long run.

It is often right to keep the ace poised over dummy's king, so East routinely played the ten. With the nine in the dummy, however, this play is an error as the sequel showed. It

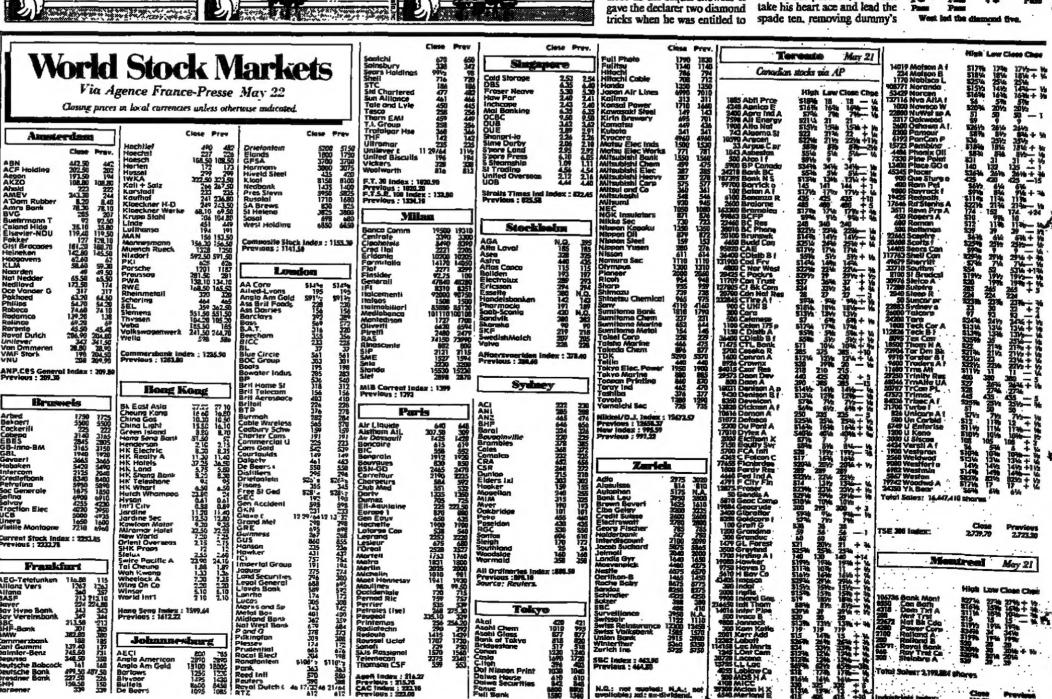

none before the lead and one entry before the hearts are unafter it.

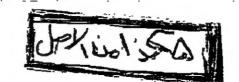

shifted to the heart ace, but the defense was not easy.

If East had shifted to a club, South would have won with the king, finesed the spade jack and led a heart. That would have given East the Morton's Fork choice: Save the ace and lose it permanently, or spend it and give South two discards for his club losers.

However, there were two effective defenses after the error at the first trick. In the Morton's Fork position, East can take his heart ace and lead the spade ten, removing dummy's blocked. Or he could have re-

Ilkka Sinisalo, Ron Sutter, Tim Kerr and Dave Poulin scored for the Flyers, who extended their remarkable unbeaten streak against the defending Stanley Cup champions to nine games. The last time the Oilers beat the Flyers was Nov. 13, 1982; Philadelphia is 8-0-1 against Edmonton since.

Lindbergh kept the Oilers at bay until Tuesday's outcome was assured, then was beaten by Willy Lindstrom to end a shutout streak that had reached 149 minutes and 50 seconds. The last previous goal Lindbergh had allowed was to Quebec's Jean-François Sauve in the second period of Game 5 in the Wales Conference finals.

Sutter continued a remarkable playoff checking performance that he started against the likes of Bryan Trottier and Peter Stastny by hold-ing superstar Wayne Gretzky without a shot. It is a rare night when Gretzky does not score; for him to go without a shot on goal borders on the unthinkable.

"I'm a little more aware when he's on the ice, but I didn't try to shadow him," said Sutter. "It was a total team effort that shut him down. I don't think we gave him a

Lindbergh's left. Poulin completed

the scoring into an empty net al

The Oilers were unhappy because the Flyers had six power plays - to Edmonton's one - in the first 30 minute. The Flyers objected when defenseman Keviri Lowe crashed into the net with Sinisalo in scoring position, dislodging it without a penalty call.

We spent the first two periods

trying to kill penalties." Sather "For the first half of the game. they had seven and a half power plays to our half a one. That hurt

our hockey club." "We felt the net was dislodged; intentionally, but our team has a great deal of discipline and we didn't let it upset us, said the winning coach, Mike Keenan, "We have a young team, but everybody was relaxed and ready to play. We'd been looking forward to this

Reuschel, Recalled, Recalls Reuschel of Old

PITTSBURGH - Rick Renschel is back, and so is his fastball. The 36-year-old right-hander, recalled from the minors the day before, gave up only one run and

BASEBALL ROUNDUP

three hits over 7% innings in his first major-league start since last Aug. 10 as Pittsburgh beat Hous-ton, 3-2, here Tuesday night.

Reuschel, a major-league veteran of 12 years (almost all with the Chicago Cubs), retired 15 of the first 16 batters before needing help from John Candelaria in the eighth

"I'm just glad to be here," said Reuschel, who has battled through four years of shoulder problems and signed a minor-league contract with the Pirates after being released by the Cubs last November.

Reuschel was 6-2 with a leaguebest 2,50 earned-run average with Hawaii of the Pacific Coast League until joining Pittsburgh. "I wasn't disappointed when I didn't make Who is Carl Williams? And why, excepting greed and obsession, was Holmes lighting him? (Similarly, consider make their staff unless

healthiest spring I ever saw."

Pittsburgh took a 2-0 lead in the first on Bill Madlock's single, a walk to Jason Thompson and rupscoring singles by George Hendrick and Tony Pena. They made it 3-1 in the fifth when Mike Scott walked the bases full and then walked

Steve Kemp.
In the Houston third, Craig
Reynolds tripled off the right-field wall and scored on Scott's fly to left. Jerry Mumphrey delivered a ninth-inning sacrifice fly to drive in the other Astro run.

Reuschel needed only 40 pitches through his first live innings, and Manager Chuck Tanner said: "I've seen him throw pitches this year he hasn't thrown in years."

Astro Manager Bob Lillis con-curred. "He pitched a beautiful game. He's a very knowledgeable pitcher. He uses the corners and in three runs with a home run and a makes you bit the ball. His ball was sacrifice fly and winning pitcher moving. He kept it down. He hit Bill Gullickson added a two-run the corners. He changed speeds, and he kept the hitters off bal

ART BUCHWALD

The Bitburg Backlash

WASHINGTON — It didn't get much play in the United States, but after all the trouble States, but after all the trouble Ronald Reagan went to in helping his buddy Helmut Kohl with the West German election, the chancellor got clobbered in the state election in North Phina Westabe election in North Rhine-Westpha-

For those of you who can re-member that far back, the reason the president took his famous walk

through the Bitburg cemetery because Kohl's Christian Democrats were being threatened Willy Brandt's hated Social Democrats. Reagan was led to be-lieve that if he

stopped by Bit- Buchwald burg for a photo opportunity Kohl would beat the Socialists in a land-

As soon as I heard on the radio that Reagan's graveyard visit was for naught, I called Klaus Berger, my stringer in North Rhine-Westphalia, and demanded an explana-

Klaus said, "It was a question of Teflon failure. Reagan tried to give some of his Teflon to Kohl, but it wouldn't stick."

"How could that be? Reagan's Tellon is considered the top of the line in America."

"But it's not transferable." Klaus said. "Kohl's mistake was believing that all he had to do was rub shoulders in a German military cemetery with the president of the United States and he'd have Reagan's charisma. It obviously didn't work."

"How could Kohl have been so far off the mark?"

"Let's start at the beginning. Kohl came to Washington and in-sisted that Reagan include him in on the 40th anniversary of the end of World War II. The chancellor said that the reason his party was in

INTERNATIONAL

wasn't allowed to participate in the anniversary of the D-Day landings at Normandy last year. Kohl made a very convincing argument that if it hadn't been for the Germans there would not have been a World

War II in the first place. "So Reagan, who considers Kohl a team player, said he would be happy to help beat Willy Brandt's Socialists in any way he could. To which Kohl suggested that they stroll through a German military cemetery together to show the world that bygones can be by-

"So far so good," I said.
"Not necessarily," Klaus said.
"Kohl should have known you can't go into a German military cemetery without running into a Nazi tombstone. After the visit was announced the press found 49 of them. Instead of Kohl canceling, he insisted that the ceremony still take place. It was the worst political decision of his life."

"Why?" "Because everyone had forgotten what the Nazi regime had done until the chancellor announced he and the president were going to Bitburg to forget it. Suddenly TV screens in every corner of the globe showed films of Nazi atrocities. and newspapers headlined lengthy stories on war crimes committed by the Germans. Instead of reconciliation, Kohl opened up every wound from the Second World War. That's why he's considered a Dummkopf.

"But according to the polls," I said, "the West Germans support-

ed the Bitburg visit."
"What else could the German people say to the polisters?" Klaus replied. "But once it was over they decided to send Kohl a message."

"They don't want any more reconciliation ceremonies over World

"It seems such a waste," I said. "If Kohl failed to benefit by it. Reagan surely didn't either."

"How's that?" Klaus asked. "Well, when the president left for Europe his Tellon suit was all shiny and glittery. But when he came back from Bitburg it was scratched and tarnished. I guess the one thing everyone has learned from all this is that only in Chicago does the cemetery vote still count."

Katharine Hepburn

'I Think I'm Very Irritating to Some People ... I'm So Sweet Really'

She said her only real difficulty

these days was "this fool ankle that gives her a tad of trouble from time to time. It turned com-

pletely around when she ran ber

car into a telephone pole about

11/2 years ago while admiring an old shipyard. Doctors fused it.

as well as it can work," she said.

"And if it defeats me someday, I have to say, 'I've had many years of very good use of it.'"

Call it common sense. Or per-

haps Yankee tenacity, which she

inherited from her parents. Her father, Dr. Thomas Norval Hep-

burn, was a urologist who cam-

paigned for public awareness of

venereal disease. Her mother, Katharine Houghton, was a suf-

fragist and a crusader in the birth

Their tenacity, she said, freed her from fear. "I wasn't afraid to

pay the price of saying what I thought. I wasn't cautious."

The Hepburn house was often

filled with the social reformers of the day, including the British suf-

fragist Emmeline Pankhurst.

Katharine was a willing partici-

"I used to carry a ballot box

pant in the Suffrage Movement.

with my aunt, who was 5-foot-10 and very proper. She carried a sign: Women, idiots and crimi-

nals vote here." She laughed in that voice Tallulah Bankhead

once likened to "nickels dropping

in a slot machine." For Hepburn, it was never tough being a wom-an. At Bryn Mawr College, she almost flunked out but buckled

down to work so she could act in

After graduating, she landed a bit role in a Broadway flop. "These Days." Then came a lit-

any of firings until she was re-hired in "The Warrior's Hus-

in her role as the Amazon queen,

and RKO, captivated by the leg-

gy unknown, gave her a screen test. Her first movie, "A Bill of

Divorcement." with John Barry-

school plays.

band."

control movement.

"I have to make this foot work

By Dolores A. Barclay

The Associated Press
N EW YORK — Age has not rounded the angles, nor time withered the arrogance. She is bony and bossy, still. Her Bryn Mawr voice may quaver a bit, but her viperish wit is steady.

"I think I'm very irritating to

some people; it fascinates me, though because I'm so sweet really." Katharine Hepburn said with a bright smile.

"I'm basically shy. As my fa-ther once said. 'Children who are very shy are afraid they won't be the bride or the corpse. I hope he was wrong.

She has seen 75 winters and springs, frets about the tulips and hyacinths in her backyard, rails at youthful sex, supports abortion and champions euthanasia for the elderly.

"My values come from my mother and father. They were real left-of-center reformers," she said recently at her brownstone in Turtle Bay. They were her great-est influences. And others? "I guess life and the people I knew. By the time you're 20, you're a pretty solid piece of work."

Hepburn's latest movie, "Grace Quigley," is an odd story about an old woman who teams with a professional hit man (Nick Nolte) to provide a service for old people who would rather die than

"I think there's sort of a terrible fear of death in this country, and I just don't think you should fear something that is absolutely inevitable," she said briskly. "If you think you're in the way

and you're getting nothing out of life and certainly nobody wants you, and you're using up what little money you have and you feel right to say, 'Bye-bye,' I don't

see why you can't do it.
"I think it's everyone's own business. You've been tossed out of your job, you're deaf, blind and totally dependent on this, that and the other thing. I think it's common sense. I've been extremely lucky. I've got money and I can decide to work or not work. more, was a success. Her next was I've been terribly lucky all my a dud. The third, "Morning Glo-life." a dud. The third, "Morning Glo-ry" in 1933, won her first Oscar;

"You have to do things that affect you."

three others came in 1967, 1968 successful. You have to do things and 1981, for "Guess Who's that affect you."

Coming to Dinner," "The Lion in Spencer Tracy
Winter" and "On Golden Pond."

friend for 27 In the 1930s there were years of

being "box-office poison." "I've been the joke of New York City and deservedly so. But I was at an age then that for some reason it really didn't depress me too She rose from the Hollywood

graveyard in 1940 with "The Philadelphia Story." Philip Barry wrote it for her and it became a smash on Broadway. "I bought the movie rights. They wanted to buy it for all of my rivals, but I already owned it. Very clever," she smiled.

"Then I stayed at Metro [MGM] and did all those pictures with Spencer. I've done things for

Spencer Tracy was her closest friend for 27 years. She was linked romantically with the billionaire industrialist Howard Hughes and the producer Leland

Hayward and was married once

- in 1928 to a Philadelphia so-

cialite, Ludlow Ogden Smith.

They divorced in 1934. Hepburn spends much of her time on the Connecticut shore with her brother, Dick, in the old family home. She looks for the right movie projects, plays tennis

and gardens.
"The theater is terrifying. I think selling yourself is terrify-ing; you can't assume that you're fascinating. I saw someone on the street the other day and she called to me: You're shorter than I the honest reason that I like them. thought.' I called back, 'I'm You can't do things just to be shrinking.'"

dis of India, and visited two Moscow galleries displaying Rus-sian icons and Western art, accordsan icons and western are according to the Tass news agency. It is imissual for wives of Communist Party general secretaries to engage in public activities and a break with recent tradition for them to bementioned in the official press. Since Mikhail S. Gorbacher was elected party chief in March, his wife has become a familiar face in the West, but no pictures of her have appeared in the Soviet Union.

Dorothy Hamili Martin, the 1976 Olympic figure skating champion, was told Tuesday by a federal appeals court in San Francisco that she could not collect \$366,000 in insurance for stolen jewelry that she failed to put in a hotel safe. Hamili and her husband, the actor Dean Paul Martin, sued the underwriters Lloyds of London, who refused to pay the value of the jewels that were stolen from a San Francisco hotel room in December 1982. The insurance policy excluda hotel unless it was locked in a safe or "attended by" the policy-holder. Hamill left the jewels in a suitcase that she hid under a bureau in her

Pierre Cardin opened a bakery in his Maxim's French restaurant in Beijing on Wednesday, and orga-nized a two-day fashion show, his fourth in Beijing. The bakery will produce French bread, croissants and pastries for a mainly Chinese clientele, the French master baker Eric Chatenay said. A tea room is to be added in the next few weeks. Cardin said that he hoped to open new ready-to-wear clothing work-shops in Beijing and Shanghai, with part of their production for export. His fashion show coincides with a two-month retrospective of creations by another French designer, Yves Saint Laurent.

Leftist students in Sunderland, England, booed the visiting Prince Charles and his wife, Diana, waving placards Tuesday saying "Go Home Parasites" and "Hello Big Ears." Meanwhile, Geoff Dodds, a former Labor Party councilman,

Raisa Gorbacheva, wife of the Soviet leader, toured Moscow on Tuesday with Socia Gandhi, wife of the visiting Prime Minister Rajiv feet by 3 leet (1.8 meters by 0.9 Gandhi of India and visited are meters), that he had erected on the roof of his home. He said he was released without being charged after the royal couple had left the city. Police confirmed they confiscated a pair of large wooden ears together with posters and arrested Dodds and another demonstrator. Prince Charles, with a grow-

ing family and his wife's wardrobe to support, has given himself a 27percent pay rise and boosted his annual income to more than \$1.3 million. The prince is entitled to the profits from the Duchy of Corn-wall, a rich 125,000-acre (50,000hectare) estate scattered across Britain, which was established in 1337 to provide money for the heir to the throne. Unlike his mother.

Queen Elizabeth II, and other members of the royal family. Charles receives no money for his ceremonial duties and for his wife, Princess Diana, and their children, princes William and Henry.

When the author Julie Bovasso

came on stage before the third act of her play "Angelo's Wedding" in New York, she didn't thank the audience - she told them to go home. Her outburst climaxed an artistic dispute with the management of the Circle Repertory Comcasting that has caused the off-Broadway troupe to cancel Boavas-so's play, which was to have been its final production of the season. As long as problems with the playwright remain unresolved, Circle Rep considers potential risks to actors and audience too great to hazard resumption of the project," Marshall W. Mason, Circle Rep's artistic director, said. The cancellation will cost the company in ex-cess of \$100,000, Mason said. He said the May 11 incident occurred when Boyasso attacked a theater intern and the house manager when they tried to remove her from the theater during a performance. She then appeared on stage at the be-ginning of the play's third act and urged the audience to leave. No one walked out, and the play continued. The following day, the actor Scott Glenn resigned and Circle Rep suspended performances of the play.
